This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

The PREFACE.

IT may be proper to acquaint the Reader with what Improvements have been made in this new Edition. In the Tables of the Patriarchs and ancient Kings, Care has been taken to ſignifie, with the utmoſt Brevity, the relation which every Perſon bore to his immediate Predeceſſor. In the Geographical Part, beſides the adding of many remarkable Places both in ancient and preſent Geography, the Memorial Lines, for the general and particular Diviſions, have many of them been form'd a-new, with particular Regard to the Situation of the reſpective Kingdoms, Provinces or Countries, into which thoſe Diviſions have been made; ſo that every Line is in ſome Meaſure the Epitome of a Map. The Tables of ancient Coins, Weights and Meaſures have been carefully reviewed, and very much augmented and Decimal Tables ſubjoyn'd, of great Uſe for the more ſpeedy and exact Reduction of them. There is likewiſe added an Index of the Hiſtorical, Chronological and Geographical Words; of the Uſefulneſs of which I have given an Account in its proper Place. Beſides theſe there are ſeveral Alterations and Additions of leſs Moment, interſperſed throughout the whole; ſuch as either my own Experience or the Judgment of my Friends had ſuggeſted to me, in order to render the Deſign more uſeful. I ſhall not trouble the Reader with the Reaſons of them, which, if he compares the two Editions, he will very probably find out himſelf; Nor do I think it neceſſary to apologize for having made them, ſince it could not be expected that an Invention of this Kind ſhould be ſo perfect at firſt, as not to be capable

capable of being conſiderably improved. And I was the more willing to beſtow ſome Care and Pains upon it, and to give it what Improvement I was able, in Return for the favourable Reception it has met with from the Publick, beyond what was expected by my ſelf or others. An Art of Memory has by many been looked upon as a thing either in it ſelf impracticable, or, at leaſt, in the common Methods of it, uſeleſs and trifling. And I was ſenſible that the following Method would lie under the additional Diſadvantage of a whimſical and out of the way Appearance: Beſides that the ſeeming Difficulty of it at firſt Sight would, I foreſaw, deter many from ſo much as attempting to make themſelves Maſters of it. Notwithſtanding theſe Diſcouragements, it has had the good Fortune to give ſome Satisfaction, and to meet with ſome Succeſs; and will, I hope, continue to be look'd upon as an uſeful Help to thoſe who delight in Reading, and would retain what they read with Faithfulneſs and Accuracy, particularly in ſuch Points wherein their Memories are moſt likely to fail them.

The Objections which have been made to it from the Difficulty of remembring the Memorial Lines would moſt effectually be removed by habituating young Minds to them betimes, by the frequent tranſcribing and Repetition of them. The Technical Words would by this Means become natural and familiar, and of no ſmall Advantage to them in the Courſe of their future Studies; they would be eaſily received and long retain'd. But I ſhall ſay no more upon this Point, having already touch'd upon it in the Introduction; to which alſo I refer the Reader for what might further be expected by way of Preface.

THE

THE

INTRODUCTION.

'TIS a general Complaint amongſt Men of Reading, and to many a Diſcouragement from it, that they find themſelves not able to *Retain* what they read with any Certainty or Exactneſs. And in no Part of Literature is there greater Room for this Complaint than in *Hiſtory:* To the ſtudying of which with Pleaſure and Improvement, as nothing contributes more, ſo nothing has been thought more difficult to be *retain'd*, than a diſtinct and accurate Knowledge of *Chronology* and *Geography*. Upon this Account ſeveral Attempts have been made to remedy, in ſome Meaſure, the Defects of the Memory, by Chronological and Geographical Tables, Cuts and Maps, and by reducing the principal Parts of Hiſtory to certain Epocha's or Æra's, ſo diſpoſed and contrived, as may be moſt likely to

affect the Imagination, and make the deeper Impreſſion upon the Mind. Thus Mr. *Hearne* in his *Doctor Hiſtoricus*, has reduced the whole Compaſs of Chronology to thirteen Grand Epocha's, all beginning with the Letter C. Mr. *Prideaux*, in his *Introduction to Hiſtory*, has made Uſe of the Number *Seven*, throughout his whole Book; "not out of Af-"fectation (as he tells us) but Experience, as "*moſt eaſy for the Memory*;" with others of the like Nature, which ſerve at leaſt to ſhew that the Memory wants Aſſiſtance, and that ſmall Helps are better than none. But of all the Inventions made Uſe of for this End, none has been found to contribute more to the Aſſiſtance of the Memory than that of *Technical* Verſes; both as they generally contain a great deal in a little Compaſs, and alſo becauſe being once learn'd, they are ſeldom or never forgot. For the Truth of which I may venture to appeal to the weakeſt Memories, whether they have not to the laſt found themſelves in Poſſeſſion of that ever memorable Line:

Barbara Celarent Darii Ferio Baralipton.

Of this Nature is the following Method; the Deſign of which is not to make the *Memory better*, but *Things more eaſy to be remember'd*; ſo that by the Help of it an ordinary, or even a weak Memory, ſhall be able to retain what the ſtrongeſt and moſt extraordinary

dinary Memory could not retain without it. For as he, who firſt contriv'd to aſſiſt the Eye with a Teleſcope, did not by that pretend to give Sight to the Blind, or make any Alteration in the Eye itſelf; but only to bring the Objects nearer, that they might be view'd more accurately and diſtinctly; ſo neither is it pretended * by this Art to teach thoſe to remember every Thing, who never could remember any Thing; or to make Men in an Inſtant ſkilful in Sciences, which before they were utterly unacquainted with, but only to enable them to retain, with *Certainty* and *Exactneſs*, what they have already a general and competent Knowledge of: that they may not be oblig'd upon every Occaſion to have freſh Recourſe to their Books or Maps, or be under the tireſome Neceſſity of reading the ſame Things again and again, ſtill forgetting them as faſt as they read them.

To thoſe who may object, of what Uſe is it to be thus exact, and content themſelves with an imperfect and confuſed Remembrance of what they read, it might be anſwer'd, that ſuch as think it of no Uſe, need not, as I preſume they will not, trouble themſelves

---

* Hæc ars tota habet hanc vim non ut totum aliquid, cujus in ingeniis noſtris pars nulla ſit, pariat & procreet, verum ut ea, quæ ſunt orta jam in nobis & procreata, educat atque confirmet. *Cic. de Orat.* Lib. II. *Edit. C. Steph.* p. 182.

about it; this being deſign'd for the Benefit of thoſe only, who think it is of Uſe; and who, even at the Expence of a little Pains, would remember if they could: But beſides this, I believe it will be agreed on all Hands, that, to inſtance in Hiſtory only, a Man who *has* an exact Notion of Time and Place, finds incomparably more Pleaſure, and makes a ſpeedier Progreſs in that Study, than he who *has not.*

I ſhall here beg Leave to tranſcribe a Paſſage from Mr. ADDISON's *Dialogues, upon the Uſefulneſs of Ancient Medals:* "There is "one Advantage, ſays *Eugenius*, that ſeems "to me *very conſiderable*, which is the great "Help to Memory one finds in Medals: "For my own Part I am very much embar-"raſſed in the Names and Ranks of the ſe-"veral *Roman* Emperors, and find it diffi-"cult to recollect upon Occaſion the diffe-"rent Parts of their Hiſtory; but your Me-"dalliſts, upon the firſt naming of an Em-"peror, will immediately tell you his Age, "Family and Life. To remember where "he enters in the Succeſſion, they only "conſider in what Part of the Cabinet he lies, "and by running over in their Thoughts "ſuch a particular Drawer, will give you an "Account of all the remarkable Parts of his "Reign."

If this be ſuch a *conſiderable Advantage* in Medals, I hope it will be allow'd that the following Method is of ſome Uſe, ſince by it

it a Man may be enabled to remember when any Emperor from *Julius Cæſar* to *Conſtantine* began his Reign, and that as readily as you can name him, by the Help of no more than *ſix Memorial Lines*. The like he may do with the ſame Eaſe and Readineſs by the Kings of *England*, and ſo proportionably for any other Part of Sacred or Profane Hiſtory. For, how impracticable ſoever it may ſeem at firſt View, I have Reaſon to believe, that any Reader of a common Capacity may, by a regular Proceeding, and ordinary Application, be able readily and exactly to anſwer *moſt*, if not *all* the Queſtions that can be propoſed from the following Tables.

The Manner in which I would adviſe him to proceed (after having premiſed that he muſt not be too haſty at firſt, but make himſelf * Maſter of one Thing before he proceeds to another, beginning with ſuch Particulars as he has moſt Occaſion or Inclination to retain) is this. Firſt let him learn to *explain* the ſeveral *Memorial Lines*, according to the Method hereafter to be laid down, by conſulting the Tables to which they belong. 2. This done, let him by looking upon the Tables learn to

* Aſſumendus Uſus paulatim, ut pauca primum compleCtamur Animo quæ reddi fideliter poſſint: mox per incrementa tam modica ut onerari ſe labor ille non ſentiat, augenda uſu exercitatione multa continenda eſt, quæ quidem maxima ex parte memoria conſtat. *Quintil.* Lib. X. Edit. *Gibſ. Ox.* p. 534.

make

make out the Lines; and 3. Let him charge his Memory with them, by *frequent Repetition.* By this Means the Words will become *familiar*, how harſh and uncouth ſoever they may appear at firſt; and he will find it as eaſy to know the Diameter, Diſtance, and Magnitude of any Planet; the particular Time or Age of any remarkable Perſon or Thing; the Longitude and Latitude of any Place, and the like, as it is to remember their *Names:* The whole Art being in Effect nothing more than this; *To make ſuch a Change in the* Ending *of the Name of a Place, Perſon, Planet, Coin,* &c. without altering the Beginning *of it, as ſhall readily ſuggeſt the Thing ſought, at the ſame Time that the Beginning of the Word, being preſerved, ſhall be a* leading *or* prompting *Syllable to the Ending of it ſo changed.*

I would willingly here let the Reader a little more into my Meaning, which he may not otherwiſe ſo readily apprehend, leſt he ſhould think there is more Difficulty in the Matter than there really is. I would aſk him then if he thinks he could remember to call CYRUS, Cyr*uts*; or ALEXANDER the Great, A-lex*ita*; or JULIUS Cæſar, Juli*us* Cæſar; or MAHOMET, Mahom*audd*; if he can but do this, he has nothing elſe to do (when he is once Maſter of the general Key, and knows what Letters of the Alphabet ſtand for what Figures) in Order to remember, without any Poſſibility of being miſtaken, that the Years in which *Cyrus, Alexander,* and *Julius Cæſar,*

founded their reſpective Monarchies, were as follow:

	Bef. Chriſt.
CYRUS [Cyr*uts*]	536
ALEXANDER [Alex*ita*]	331
JULIUS Cæſar [Juli*os*]	46

And that the *Mahometan* Æra, or Flight of *Mahomet*, was *A. D.* 622. In like Manner for Geography; does he think he could remember to call MADRID Madr*oy-t* or JERUSALEM Jeru*ta-ts*, or BLENHEIM Blenhe*bav*, or THESSALY Theſ*jan?* This is all that is requir'd to remember that the Degree of Latitude of *Madrid* is about 40, and the * Longitude about 3. The Latitude of *Jeruſalem* about 31, and the Longitude 36; that *Blenheim* is in *Bavaria*, and that what was the ancient *Theſſaly* is the preſent *Janna*. Thus the Reader will obſerve, that all that he has to do, is for one Word to remember another, which only † varies from it a little in the *Termination*. And to make even this eaſier to be remem-

* The Reader is preſumed to be ſo far acquainted with Geography, as to be able to tell which is Eaſtern and which is Weſtern Longitude, when he is inform'd that the firſt Meridian is fix'd at *London*.

† In many Words the Variation is very ſmall; as K. John K. *Jann*, INACHUS In*akus*, SOLON So*lun*, HERODOTUS Herodo*fus*, PLATO Pla*tok*, TRAJAN Traja*nk*, CLEOPATRA Cleopat*la*, GORDIAN Imp. Gor*din*, the Battle of MARATHON Marath*onz*, ATTILA Att*ila*, CROESUS Cræſ*uſe*, AUSTIN Auſt*ins*, &c. Thoſe which appear more difficult will be full as eaſy, when familiarized by Uſe.

ber'd,

ber'd, the *Technical* Words are thrown into the Form of common *Latin* Verſe, or at leaſt of ſomething like it. For as there was no Neceſſity to confine myſelf to any Rules of *Quantity* or *Poſition*, I hope I need make no Apology for the Liberty I have taken in having, without Regard to either, and perhaps now and then without ſo much as a Regard to the juſt Number of Feet, only placed the Words in ſuch Order as to make them run moſt eaſily off the Tongue, and ſucceed each other in the moſt natural Manner. But this by the Way for the Reader's Encouragement.

In the mean Time, till he can repeat the *Memorial Lines*, and to thoſe who are not willing to give themſelves any Trouble at all in charging their *Memory* with them, the *Tables* themſelves will not be without their Uſe: Of which it may be expected that I ſhould give ſome Account.

For the Chronology and Hiſtory I have chiefly conſulted * Archbiſhop *Uſher's* Annals, *Marſhall's* Chronological Tables, *Petavius's Rationarium*, Mr. *Hearne's Ductor Hiſtoricus*, and Biſhop *Beverege's Inſtitutiones Chronologicæ*. The Succeſſion of the *Aſſyrian* and *Babylonian* Monarchs, the Kings of *Perſia*, *Media*, *Syria*,

* It may be ſome Satisfaction to the Reader, to know that Mr. *Pedford* (as he tells us in the *Preface* to his *Scripture Chronology*) *never* differs from Dr. *Prideaux*; and even from the Creation of the World to the Deſtruction of *Jeruſalem*, never above five Years from Archbiſhop *Uſher*, the late Biſhop of *Worceſter*, or Mr. *Marſhall*.

Egypt,

Egypt, &c. is taken from Dr. *Prideaux's* Chronological Tables at the End of his *Connection*; the Times of the Flouriſhing of the Fathers, Hereticks, Councils, *&c.* from Dr. *Cave's Hiſtoria Literaria.* The *Roman* Emperors, and the Time of the Writing of the Canonical Books of the New Teſtament from Mr. *Eachard's* Roman and Eccleſiaſtical Hiſtories. The Legatin and Provincial Conſtitutions from the Biſhop of *London's Codex Juris Eccleſiaſtici.* The Aſtronomical Calculations are from Dr. *Derham's* Aſtro-Theology. I have alſo added Mr. *Whiſton's* from his Theory of the Earth. In the Geographical Part my chief Guide has been Dr. *Wells's* Treatiſe of ancient and preſent Geography, whoſe Maps may be conſulted by the Learner. For the Coins, Weights and Meaſures I have chiefly been obliged to Dr. *Arbuthnot's* Book and Tables, not without conſulting Biſhop *Cumberland*, Dr. *Bernard*, and Biſhop *Hooper*, and other Writers upon that Subject, of whom I have made what Uſe I thought convenient. If any prefer other Authors, who differ from theſe, they may eaſily apply the Art to their favourite Author, by a Change of the Words according to the Method laid down. And indeed, when the Reader is perfectly Maſter of it, he would do well to form Words for his own Uſe, which perhaps he will ſooner remember than thoſe which I had form'd for mine; my Deſign being rather to give a Specimen of what might be done by it, than a Set of *Compleat* Tables in the reſpective

Sciences. If ſome think I have been deficient in leaving out what they think worthy of remembring, others perhaps will think I have been too Full. To both theſe I anſwer, that I impoſe no Taſk upon my Readers, nor deſire to prevent their own Improvements; they may add what they pleaſe, and paſs by what they pleaſe. Nor do I think it at all neceſſary that they ſhould be able to anſwer *every* Particular in the following Tables; only this I may venture to affirm, that if they once charge their Memory with them, they will find them no Burden, and that 'tis not only practicable, but eaſy to be done.

'Tis not to be expected that Gentlemen, who have gone through the Courſe of their Studies, will trouble themſelves to begin again a-new, and go regularly through the *whole*: But it is ſubmitted to thoſe who have the Education of young Students in the Univerſities and publick Schools, whether it would not be of ſome Service towards facilitating the Progreſs of their Pupils and Scholars in uſeful Knowledge, to have them early and thoroughly acquainted with this ſmall Treatiſe. 'Tis the Advice of *Quintilian*, that Boys ſhould be uſed to repeat, as faſt as poſſible, harſh and crabbed Words and Verſes, purpoſely made difficult, in order to give them a more full and articulate Pronunciation. His Words are theſe: * *Non alienum fuerit*

* Inſt. Orat. Edit. *Gibſon. Oxon.* p. 12.

exigere

exigere ab his ætatibus, quo ſit abſolutius os & expreſſior ſermo, ut nomina quædam verſuſque affectatæ difficultatis, ex pluribus aſperrime coëuntibus inter ſe ſyllabis catenatos & veluti confragoſos, quam citatiſſime volvant. The frequent Repetition of the following *Memorial Lines* would certainly anſwer *this* End, and at the ſame Time a *much better*; and if I might alſo recommend, as he does, the *Writing* of them too, in order to make the deeper Impreſſion, it would doubtleſs have a good Effect, and Boys would be treaſuring up Learning even before they were aware of it. † *Illud non pœnitebit curaſſe cum* Scribere *nomina puer (quemadmodum moris eſt) cœperit, ne hanc operam in vocabulis* vulgaribus *& forte occurrentibus perdat. Protinus enim poteſt Interpretationem linguæ ſecretioris quam* Græci γλώσσας *vocant, dum aliud agitur, ediſcere, & inter prima Elementa conſequi rem poſtea proprium tempus deſideraturam.* It may be ſufficient to have juſt hinted theſe Things to thoſe whoſe more immediate Province it is, and who are beſt qualified to judge what Methods may moſt effectually contribute to the Improvement of thoſe under their Care.

From the Account I have given of it, the Reader will obſerve, that the Method here propoſed is perfectly different from that of

Repo-

Repoſitory of Ideas, a large Houſe or the like, divided into ſeveral Apartments, in each of which you are to place in Order a ſymbolical Repreſentation of the Things which you would remember) they have given us a very full and particular Account, as alſo of the Occaſion which firſt gave Riſe to it. What Improvements have been made of this Method by ſome modern Authors, or in what Manner, or with what Succeſs others have ſet up to teach privately the Art of Memory, I am altogether ignorant. Having found my own Method ſufficient for myſelf, I had no Inclination to look after any other. What Uſe it may be of to the Publick muſt be left to Experience. The Novelty of it may, perhaps, recommend it to the Inquiſitive and Curious; and I deſire nothing more than that into whoſe Hands ſoever it may fall, he would not be prejudiced againſt it upon the Account of its *ſeeming Difficulty*, before he has made *Trial* of it, being inclined to think that to any one, who is at all acquainted with it, it will be found to be ſo far from being *really* difficult, that nothing can be more eaſy, or more obvious. The Repreſentation of Numbers by Letters of the Alphabet hath been a Thing in Practice, more or leſs, almoſt in every Language. The only Thing wanting was to make that Repreſentation further uſeful, by ſubſtituting Vowels as well as Conſonants for the numerical Figures, in ſuch Manner and Proportion, that any Num-

ber

ber might be form'd into a Word capable of being articulately pronounced, and conſequently more perfectly remember'd. Amongſt the *Jews*, indeed, of whoſe Alphabet the Vowels are no Part, it was a Practice, not only to abbreviate Sentences and Names of many Words, by putting together the Initial Letters of thoſe Words, and making out of them an * *Artificial Word* to expreſs the whole; but alſo to make Uſe of *Natural* Words, to repreſent Numbers, when they could meet with ſuch as happen'd to anſwer the Number which they wanted to expreſs. We have ſeveral Pieces of Ingenuity of this Kind in the Frontiſpieces of their Bibles, where they give us the *Year* of the Edition in ſome Word or Sentence of Scripture, the Letters of which according to their numerical Value make up the Date. † I have ſubjoin'd ſome of them for

Memoria

Memoria Technica:

OR, A

NEW METHOD

OF

Artificial Memory.

SECT. I.

THE principal Part of this Method is briefly this; To remember any thing in Hiſtory, Chronology, Geography, &c. a Word is form'd, the Beginning whereof being the firſt Syllable or Syllables of the Thing ſought, does, by frequent Repetition, of courſe draw after it the latter Part, which is ſo contriv'd as to

give the Anſwer. Thus, in Hiſtory, the Deluge happened in the Year before *Chriſt* two Thouſand three Hundred forty eight; this is ſignified by the Word *Deletok:* Del ſtanding for DELUGE, and *etok* for 2348. In Aſtronomy, the Diameter of the Sun (SOLIS Diameter) is eight Hundred twenty two Thouſand one Hundred and forty eight *Engliſh* Miles; this is ſignified by Soldi-*ked-áfei*, Soldi ſtanding for the Diameter of the Sun, *ked-afei*, for 822,148; and ſo of the reſt, as will be ſhewn more fully in the proper Place. How theſe Words come to ſignifie theſe Things, or contribute to the Remembring of them is now to be ſhewn.

The firſt Thing to be done is to learn exactly the following Series of Vowels and Conſonants, which are to repreſent the numerical Figures, ſo as to be able, at Pleaſure, to form a *Technical* Word, which ſhall ſtand for any Number, or to reſolve a Word already form'd into the Number which it ſtands for.

a	*e*	*i*	*o*	*u*	*au*	*oi*	*ei*	*ou*	*y*
1	2	3	4	5	6	7	8	9	0
b	*d*	*t*	*f*	*l*	*s*	*p*	*k*	*n*	*ſ*

Here *a* and *b* ſtand for 1, *e* and *d* for 2, *i* and *t* for 3, and ſo on.

Theſe Letters are aſſign'd Arbitrarily to the reſpective Figures, and may very eaſily be remember'd. The firſt five Vowels in order naturally repreſent 1, 2, 3, 4, 5. The Dipthong *au*, being compoſed of *a* 1 and *u* 5 ſtands for 6; *oi* for 7, being compoſed of *o* 4 and *i* 3; *ou* for 9, being compoſed of *o* 4 and *u* 5. The Diphthong *ei* will eaſily be remember'd for *ei*ght, being the Initials of the Word. In like Manner for the *Conſonants*, where the Initials could conveniently be retain'd, they are made uſe of to ſignifie the Number, as *t* for three, *f* for four,

s for ſix, and *n* for nine. The reſt were aſſign'd without any particular Reaſon, unleſs that poſſibly *p* may be more eaſily remembred for 7 or Septem, *k* for 8 or ὀκτὼ, *d* for 2 or *duo*, *b* for 1, as being the firſt Conſonant, and *l* for 5, being the Roman Letter for 50, than any others that could have been put in their Places.

The Reaſons here given, as trifling as they are, may contribute to make the Series more readily remembred; and if there was no Reaſon at all aſſign'd, I believe it will be granted that the Repreſentation of nine or ten numerical Figures by ſo many Letters of the Alphabet, can be no great Burthen to the Memory.

The Series therefore being perfectly learn'd, let the Reader proceed to exerciſe himſelf in the Formation and Reſolution of Words in this Manner.

10	325	381	1921	1491	1012	536	7967
az	*tel*	*teib*	*aneb*	*afna*	*bybe*	*uts*	*pouſoi*

431	553	680	&c.
fib	*lut*	*ſeiz*	&c.

And as in Numeration of larger Sums, 'tis uſual to point the Figures at their proper Periods of Thouſands, Millions, Billions, *&c.* for the more eaſy Reading of them, as 172.102,795 one Hundred ſeventy two Millions, one Hundred two Thouſand, ſeven Hundred ninety five; ſo, in forming a Word for a Number conſiſting of many Figures, the Syllables may be ſo conveniently divided, as exactly to anſwer the End of Pointing. Thus in the Inſtance before us, which is the Diameter of the Orbit of the Earth in *Engliſh* Miles: The *Technical* Word is Dorbtér*boid-áze-poul*; the Beginning of the Word Dorbter, ſtanding for the Diameter of the Orbit of the

Earth, (Diameter ORBitæ TERRæ) and the remaining Part of it *boid-aze-poul* for the Number 172.102,795.

N. B. Always remember that the Diphthongs are to be conſider'd but as *one Letter*, or rather, as repreſenting only *one Figure*. Note alſo, that *y* is to be pronounced as *w*, for the more eaſily diſtinguiſhing it from *i*, as *ſyd* = 602, pronounce *ſwid*, *typ* = 307 pronounce *twip*.

The Reader will obſerve that the ſame Date or Number may be ſignified by different Words, according as Vowels or Conſonants are made Choice of, to repreſent the Figures, or to begin the Words with, as

325 *tel*, or *idu*, 154 *buf*, or *blo*, or *alf*, or *alo*. 93.451 *ni-ola*, or *out-fub*, or *ni-fla*, or *out-olb*, &c.

This Variety gives great Room for Choice, in the Formation of Words, of ſuch Terminations as by their *Uncommonneſs* are moſt likely to be remembred, or by any *accidental Relation* or *Alluſion* they may have to the Thing ſought. Thus the Year of the World in which *Æneas* is ſuppoſed to have ſettled in *Italy* is 2824; but as this may be expreſſed either by *ekef* or *deido*, I chuſe rather to joyn *deido* to *Æneas*, and make the Technical Word Æne*deido* than Æne*kef*, for a Reaſon which I think is obvious. Thus King *John* began his Reign *A. D.* 199. (one Thouſand being underſtood to be added, as I ſhall ſhew hereafter;) but as this may be expreſs'd by *anou*, or *boun*, or *ann*, I make Choice of the laſt, for then 'tis but calling him *Jann* inſtead of John, and you have the Time almoſt in his Name. Thus *Inachus* King of *Argos* began his Reign in the Year before *Chriſt* 1856; with a very ſmall Variation in the Spelling, 'tis his Name *Inakus* *. But this by the Way.

To

* More Inſtances of this Kind, ſee in the *Introduction*, p. ix.

To go on with our Art; 'tis further to be obſerv'd, that *z* and *y* being made Uſe of to repreſent the Cypher, where many Cyphers meet together, as in 1000, 1000000, &c. inſtead of a Repetition of *azyzyzy*, which could neither be eaſily pronounced nor remember'd, *g* ſtands for Hundred, *th* for Thouſand, and *m* for Million. Thus *ag* will be 100, *ig* 300, *oug* 900, &c. *ath* 1000, *oth* 4000, *otho* or *othf* 4004, *peg* 7200, *dig* 2300, *lath* 51000, *am* 1000000, *azmoth* 10.004,000, *ſumus* 65.000,056, *loum* 59.000,000, &c. The ſolid Content of the Earth (TERRÆ MAGNITUDO) is two Hundred ſixty four Thouſand, eight Hundred fifty ſix Millions of Cubick Miles; this is expreſs'd by the Word Ter-magnit-*ĕſo-klaum*; Termagnit ſtanding for Terræ Magnitudo; *ĕſo-klaum* for 264,856.000,000 the Number of Cubick Miles.

It will be ſometimes alſo of Uſe to be able to ſet down a Fraction, which may be done in the following Manner: Let *r* be the Separatrix between the Numerator and the Denominator, the firſt coming *before*, the other *after* it; as *iro* $\frac{3}{4}$ *urp* $\frac{5}{9}$ *pourag* $\frac{79}{100}$ or ,79 *north* $\frac{94}{1000}$ or ,094 &c. Where the Numerator is 1, or Unit, it need not be expreſſed, but begin the Fraction with *r*, as $\frac{1}{2}$ *re*, $\frac{1}{3}$ *ri*, $\frac{1}{4}$ *ro*, &c. So in Decimals, ,01 or $\frac{1}{100}$, *rag* ,001 or $\frac{1}{1000}$ *rath*.

Thus I have given the Reader a general View of what is the principal Part of this Method. I ſhall now proceed to ſhew how I have applied it to Hiſtory, Geography, Aſtronomy, and other Parts of uſeful Learning; and having explain'd a Line or two in each, leave the reſt to his own Induſtry and Sagacity.

SECT.

SECT. II.

The Application of this Art to Chronology and Hiſtory.

THE Ages of the World before our Saviour's Time are by Chronologers generally divided into Six: The Firſt from the Creation to the Deluge; the Second from the Deluge to the Call of *Abraham*, &c. according to the following Periods:

	Before Chriſt.
1. The CREATION of the World	4004
2. The univerſal DELUGE	2348
3. The Call of ABRAHAM	1921
4. EXodus, or the Departure of the *Iſraelites* from *Egypt*	1491
5. The Foundation of *Solomon's* TEMPLE	1012
6. CYRUS, or the End of the Captivity The Birth of *Chriſt.*	536

All this is expreſs'd in one Line belonging to TAB. I. as follows:

Cr*othf* Del*etok* Ab*aneb* Ex*afna* Tem*bybe* Cyr*uts.*

Cr denotes the Creation, *othf* 4004, Del the Deluge, Ab the Calling of Abraham, Ex Exodus, Tem the Temple, and Cyr Cyrus. The Technical Endings of each repreſent the reſpective Year according to the Rules already laid down.

I ſhall explain two Lines more.

Nicſilcon ári*tel*, Codathé ma*teib*, Ephcethe-nés*fib*.
Chállemar-eudí*ola*, Covijúſt-O*lut*, C-ágcopo-mon*ſeiz*.

Theſe

Theſe two Lines are a ſhort Hiſtory of the firſt Six General Councils; and every Syllable has its diſtinct Signification. The *firſt* repreſents the Place where it was held; the *ſecond* ſhews who was Pope at that Time; the *third* under what Emperor; the *fourth* againſt what Heretick; the *fifth*, in what Year of our Lord. Thus the firſt Word is Nicſilcon àri*tel*. Nic denotes the Council of Nice, ſil Pope Silveſter, con the Emperor Conſtantine, ari the Heretick Arius, *tel* the Year 325. The ſecond Word is Codathé-ma*teib*; Co denotes the Council of COnſtantinople, da Pope Damaſus, *the* the Emperor Theodoſius, ma the Macedonians, *teib* 381. The third is Ephcethe-nés*fib*; Eph the Council of Epheſus, ce Pope Celeſtine, *the* the Emperor * Theodoſius, nes the Neſtorians, *fib* the Year 431. The fourth is Challemar-eudi*ola*; Chal the Council of Chalcedon, le Pope Leo, mar the Emperor Marcian, eudi the Errors of Eutyches and Dioſcorus, *ola* the Year 451. The fifth is Covijúſt-*Olut*; Co ſtands for COnſtantinople, vi Pope Vigilius, juſt the Emperor Juſtinian, O the Errors of Origen, *lut* the Year 553. The ſixth is C-ágcopo-mon*ſeiz*; C ſtands again for Conſtantinople, ag for Pope Agatho, copo the Emperor COnſtantine POgonatus, mon the Monothelites, *ſeiz* the Year 680.

By this Specimen the Reader will be able to judge what he is to expect from the following Eſſay, and what it will coſt him to make himſelf Maſter of it. I would by no Means have him diſcouraged at the Difficulty which, at firſt View, he may apprehend there is, in charging his Memory with ſo many harſh and barbarous Lines. For tho' they may appear to be ſo to a Perſon unacquainted with them, and as ſuch difficult to be remember'd; yet when frequent Repetition has made them familiar, what

† *Theodoſius Junior.*

what can be more eaſy than to ſupply the remaining Part of a Word, which you are prompted with the Beginning of? As for Inſtance, to complete Cr--- Del--- Ab--- Ex--- Tem--- Cyr--- with their Technical Endings, and make them up into the following Line already explained,

Cr*othf* Dél*etok* Ab*aneb* Exá*ſna* Tém*bybe* Cyr*uts*.

I have only further to deſire the Reader to take Notice, that for his greater Eaſe, that Part of the Memorial Words, which repreſents the Numbers or Dates, is diſtinguiſhed by *Italick* Characters; that Part, which is *Roman*, anſwers to the ſmall Capitals in the Tables.

TABLE I.

General Epochas and Æras Eccleſiaſtical and Civil.

	Bef. Chriſt.
The CREATION of the World [Cr*othf*]	4004
The univerſal DELUGE [Dél*etok*]	2348
The Call of ABRAHAM [Ab*aneb*]	1921
EXodus of the *Iſraelites* [Exá*ſna*]	1491
The Foundation of *Solomon's* TEMPLE [Tém*bybe*]	1012
CYRUS, or the End of the Captivity [Cyr*uts*]	536
The Birth of *Chriſt*.	
The Deſtruction of TROY [Tróy*abeit*]	1183
The Firſt OLYMPIAD [Olym*pois*]	776
The Building of ROME [Rom*put*]	753
ÆRA of NABONASſAR [Ærnabonáſ*pop*]	747
The PHILippick Æra, or the Death of *Alexander* [Phíl*ido*]	324
The Æra of CONTRACts, or of the *Seleucidæ*, called in the Book of *Maccabees* the Æra of the Kingdom of the *Greeks* [Contrác*tad*]	312

The

	A. D.
The DIOCLESIAN Æra, or the Æra of Martyrs [Diocléſeko]	284
The Æra of the *Hegira*, or Flight of MAHOMET [Máhom*audd*]	622
The Æra of YEZDEGIRD, or the *Perſian* Æra [Yéz*ſid*]	632

The Memorial Lines.

Cro*thf* Dél*etok* Aba*neb* Exá*fna* Tém*hybe* Cyru*ts*.
Tróy*abeit* Olym*pois* Rom*put* & Ærnabonáſ*pop*.
Phíli*do* Contrác*tad* ✠ Diocléſe*ko* Máhom*audd* Yéz*ſid*.

THO' I have no where (except in the Ages of the Patriarchs before *Abraham*) made Uſe of any other Æra than that of the Years before and after *Chriſt*, becauſe, thoſe being known, 'tis eaſy to find the corrſpondent Year of any other Æra, according to the common Rules laid down in Books of Chronology, which I ſhall ſuppoſe the Reader to be acquainted with; yet in the more eminent Epochas, that he may be able, at firſt Glance, to have a Notion of the Time of any Thing or Perſon which he may meet with in Authors, making Uſe of the *Julian* Period, and the Æra of the Creation of the World, I have alſo added them in the following Table.

TABLE II.

	Jul. Period.	*An. M.*
The CREATION of the World	710	1
The univerſal DELUGE	2366	1656
The Call of ABRAHAM	2793	2083
EXodus of the *Iſraelites*	3223	2513
The Foundation of *Solomon*'s TEMPLE	3702	2992

	Jul. Period.	*An. M.*
CYRUS, or the End of the Captivity	4178	3468
The Deſtruction of TROY	3531	2821
The Firſt OLYMPiad	3938	3228
The Building of ROME	3961	3251
The Birth of CHRIST	4714	4004

The Memorial Lines.

Créppaz Delpétſau Démaſus Abmezki Apépni.
Expidet Exmélat Tempipze Temménne Cymúntoſk.
Cyrpoboik Troypílta Trómekeb Olympinik Olmtêek.
Rompinſa Rómmidub Chriſmúndothf Chriſperiſoibo.

EXPLANATION.

The firſt Syllable points out the Epocha as before; the Addition of *p* or *peri* denotes that it is the Year of the *Julian* Period. The Addition of *m* or *mund*, that it is the Year of the World.

TABLE III.

Chronological and Hiſtorical Miſcellanies before Chriſt.

	Bef. Chr.
Building of the Tower of BABEL [Bábedit]	2233
MIZRAIM ſettles in *Egypt* [Mizdakk]	2188

N. B.

N. B. After *Canute* inclusive, One Thousand is to be added to each: It was thought unnecessary to express it, it being a Thing in which it is impossible that any one should mistake.

If it be desired to remember in what Month, and Day of the Month each King began his Reign, it may be done by the following Lines:

Wil-t*hó*-s*ou*-*fat* Steph-d*e* Jam-ch*ef*-*fau* Ri-l*s*-j*eb*-*ed* El-n*ap*.
Hen-g*é*-t*el*-*an* s*ez*-ch*ez* g*ib*-g*ed*-p*ed* Geor-g*a*-j*ab* An-ch*ei*.
Car-ch*ep*-r*iz* Ma-l*s* Jo-p*s* Ed-n*ás*-l*ei* r*él*-ch*o*-p*ou*-r*ek*que.

EXPLANATION.

The *Italick* Letters represent the Day of the Month; the Letter immediately preceding represents the Month itself, r standing for January, f for *F*ebruary, ch for Marc*h*, p for *A*pril, m for *M*ay, j for *J*une, l for Jul*y*, g for Auguſt, s for *S*eptember, *t* for Oc*t*ober, n for *N*ovember, and d for *D*ecember.

Thus Steph-d*e*, Steph King Stephen, d*e* Dec. 2. El-n*ap* El Elizabeth, n*ap* Nov. 17. In Words of three or more Syllables, the firſt Syllable ſtands for all the Kings of the ſame Name, and the following Syllables in Order anſwer to the firſt, ſecond, third, &c. of that Name. So Jam-ch*ef*-*fau*; Jam denotes James I. & II. ch*ef* (viz. March 24.) belongs to James I. and *fau* (viz. Feb. 6.) to James II. So Ri-l*s*-j*eb*-*ed*; Ri denotes all the Richards, l*s* (viz. July 6.) belongs to Richard I. j*eb* (viz. June 21.) to Richard II. and *ed* (viz. 22. of the ſame Month) to Richard III.

If this be thought either too difficult, or too minute, the Reader may paſs it over.

TABLE VI.

Chronological Miſcellanies ſince the Conqueſt.

	Aft. Chriſt.

GEOGRAPHICA.

SECT. III.

The Application of this Art to Geography.

IN the firſt Place are laid down the general Diviſions of *Europe*, *Aſia*, *Africk* and *America*; then the particular Diviſions of the ſeveral Kingdoms of *Europe*, into their reſpective Governments or Provinces. For every Diviſion there is one *Technical* Line, compoſed of the firſt Syllables (or ſometimes only of the firſt Letters) of the Parts or Places into which it is ſubdivided; which Syllables or Letters are diſtinguiſhed from the reſt, in the Tables, by Small Capitals, or an *Hyphen* following.

'Tis further to be obſerv'd, that the Beginning, Middle, and Ending of the Line anſwer, in order, to the *Northern*, *Middle* and *Southern* Diviſions of the Kingdoms or Countries; ſo that not only the Places themſelves, but in ſome Meaſure their Situation with Reſpect to each other may be remember'd at the ſame Time. Thus in the *Memorial Line* for *France*,

Fra= P Nor-I-cham; Bret-O-BuL; Gui-La-DaP.

P Nor-I-cham denotes the four *Northern* Governments, *viz.* P-icardy, Normandy, I-ſle of *France*, and Champagne.

Bret-O-BuL denotes the four *Middle* Governments, *viz.* Bretagne, O-rleanois, Bourgogne, and L-ionnois.

Guí-La-Da-P denotes the four *Southern* Governments, *viz.* Guienne with Gaſcony, Languedock, Dauphiny and P-rovence.

It will be yet ſome further Help to remember the Situation of Places, to obſerve, that in the ſeveral Diviſions I begin at the *Weſt*, and go on *Eaſtward*, as far as the Limits of the Country will allow, in a ſtrait Line, unleſs where the Irregularity of the Poſition makes this Method inconvenient or impracticable: Where that is the Caſe, the Reader will ſupply the Defect by his own Obſervation, and by comparing with proper Maps.

Obſerve further, that where the Syllables are connected with an *Hyphen*, the Countries denoted by them are contiguous from Weſt to Eaſt; thus,

Nor-I-cham ſhews that the *Iſle* of *France* joyns to *Normandy* on the Eaſt, and *Champagne* to the *Iſle* of *France* on the *Eaſt*. Where the Syllables or Letters denoting two or more Countries are joyn'd together without an *Hyphen*, there the Countries are contiguous from North to South. Thus Gui-La-DaP ſhews that *Languedock* joyns to *Guienne* on the Eaſt, *Dauphiny* and *Provence* to *Languedock* on the Eaſt; and alſo that *Provence* is contiguous to, and South of *Dauphiny*. Such Syllables as have an *Hyphen* preceding, but are not by it immediately joyn'd to the foregoing Syllable, ſignify that the Countries denoted by them lie Eaſtward, but are not contiguous. Thus Sp-It-Turk ſhews that *Italy* is Eaſt of *Spain*, and *Turky* Eaſt of *Italy*, but not contiguous.

When

When the Reader is become well acquainted with the *General Diviſions*, he may then go on to charge his Memory with the chief Cities, and moſt remarkable Places of every Country; their Longitude and Latitude; the Correſpondence of ancient and preſent Geography; the Geography of the Old and New Teſtament; the Proportions of the Kingdoms of *Europe* to *Great Britain*; the Situation of the moſt noted Iſlands; with other inſtructive and entertaining Particulars in Geography: All which he will find himſelf able to remember with greater Eaſe than he can poſſibly imagine, till he is acquainted with the *Memorial Lines*, contriv'd for that Purpoſe.

TABLE I.

The General Diviſions of EUROPE, ASIA, AFRICK *and* AMERICA.

I. EUROPE is divided into,

1. *Northern*; Containing NOrway, S-weden, MOſcovy; D-enmark:
2. *Middle*; Containing NEtherlands, GErmany, POland, LIttle T-artary; FRANCE, SWITZerland, HUNgary, TRANſilvania, MOldavia, VAlachia.
3. *Southern*; Containing SPain with *Portugal*, ITaly, TURKy.

Eur = No-S-Mo D; Né-Ge-Po-lT Fran-Switz Hun-Tran-Mo-Va Sp-It-Turk.

II. ASIA is divided into,

1. *Northern*; Containing Great TArtary, GEORgia.
2. *Middle*;

2. *Middle*; containing TURKY in *Aſia*; PERSIA, Empire of the MOgul, CHINA.

3. *Southern*; Containing ARABIA, Eaſt INDIES.

As = Ta-Geo; Tur-Pé-Mo-Chin; Arab -Ind ——

III. AFRICK is divided into,

1. *Northern*; Containing BARbary, BILdulgerid, E-gypt.

2. *Middle*; Containing ZAara, NEgroland, GUInea, N-ubia.

3. *Southern*; Containing CONgo, ABISSINIA, Coaſt of ABEX, Coaſt of CAFFERIA, MONOMOTOPA, ZANGUEBAR, Coaſt of AJan.

AF = BáBil-E; ZáNeGui-N; Con-Abiſſ-Abe Caf-Mono-Zangu-Aj.

IV. AMERICA is divided into,

1. *N-orthern*; Containing New WALES, New BRITAIN, LOVIſiana, CANADA or New France, New GRANADA, MEXICO, FLORIDA, New England containing theſe ſeven Provinces, (CAROLINA, Virginia, MARYLAND, P-enſilvania, New YORK, New J-arſey, New ENGLAND properly ſo call'd,) lying from South-Weſt to North-Eaſt.

2. *S-outhern*; Containing Terra FIRMA, PERU, Country of the AMAZONS, BRAſil, CHILI, PARAGUAY, MAGELLANICA.

N AM = Wal -Brit Lŏvi-Can GranMex-Flor (Cár-Vi-Ma P-YorJ Eng.

S-AM = Fírm Per-Amáz-Bra Chi-ParMag.

TABLE II.

The particular Diviſions of Northern EUROPE.

I. *NORWAY* is divided into five Parts or Governments, *viz.*

WARDhus (containing F-inmark and Norwegian LAPland,) DRONTheim, BERGen, AGGerhus † B-ahus.

II. *SWEDELAND* is divided into ſeven general Parts, *viz.*

Swediſh LApland with B-othnia intermingled, SWEden proper, F-inland, INGRIA, GOthland, SConen, LIVonia.

III. *DENMARK* contains,

The Peninſula of JUTland, ZEEland, and the leſſer Iſles.

IV. *MUSCOVY* contains many Provinces; the moſt conſiderable of which are,

Northern; Moſcovian LAPland, S-amoiedes, OBdora, COndora, SIberia, DWINA, K-argapolia.

Southern; WELIKI, PLESKOW, MOſcow, VOlodimir, MORDUA Tartars, CZERMiſſi Tartars, CASAN.

The Memorial Lines.

NOR = Ward (F-Lap) DroBerAg B. SWED = Lá (B) Swe*p* -FIngria GoSc -Liv.
DEN = Jut-Zee.
MUSC = Lap -S-Ob Có-Si DwiK; WelPlés-Mo-Vo-Mordua-Czerm-Cas.

TABLE

† *Some* make *Babus* a Part of *Swedeland.*

TABLE III.

The Particular Diviſions of Middle EUROPE.

I. The *NETHERLANDS*, or *Low-Countries*, are generally diſtinguiſhed into the *United* or *Dutch Netherlands* lying to the *North*, frequently call'd *Holland*, and the *Spaniſh Netherlands* to the *South*, frequently call'd *Flanders*, from the moſt remarkable Province in each.

The *United Netherlands* are uſually divided into theſe Seven Provinces, *viz.* FRiseland, GRoningen, OVeryſſel, H-olland, U-trecht, GElderland with Zutphen, Z-eeland.

The *Spaniſh Netherlands* are uſually divided into theſe Ten Provinces, *viz.* FLAnders, B-rabant, MARquiſate of the Empire within *Brabant*, Seignory of MAlines within *Brabant*, Part of G-elderland, LIMburg, ARTois, HAnault, NAmur, LUXEMburg.

HOLL = Fris-GrOv H-U-Ge-Zu Z; Fla-B (Mar-Ma) GLim Art-Ha-Na-Luxem.

II. *GERMANY* is divided into Nine Circles; Three *Northern*; Circle of WEſtphalia, Circle of *lower* SAXony, Circle of *upper* Saxony.

Three *Middle*; Circle of *lower* RHIne, Circle of *upper* Rhine, Circle of FRANConia.

Three *Southern*; Circle of SUABia, Circle of BAvaria, Circle of AUstria.

To which may be added, the Kingdom of *BOHEMIA*, diſtinguiſh'd into four general Parts, *viz.* LUSAtia, SIleſia, BOhemia proper, MORAvia.

GERM = We-Sal-*up*; Rhil-*u*-Fran; Sua-Bav-Aus.
BOHE = Luſa-Si Bo-Mor.

III. *POLAND* is diſtinguiſhed into two general Parts; the Duchy of *Lithuania*, and the Kingdom of *Poland* properly ſo call'd.

The Duchy of *Lithuania* contains the Duchy of Curland, SAMOGITIA, LITHUANIA proper.

The Kingdom of *Poland* contains PRUSSIA, POLACHIA, MAZOVIA, POLAND *magna*, Poland *parva*, little RUSSIA, VOLHINIA, PODOLIA.

POL = CuSa-Lith Pru Polach Maz Pol*mapa* Rus-VolhiPodol.

IV. *FRANCE* is divided into Twelve Governments:

Four *Northern*; P-icardy, NORMANDY, I-ſle of *France*, CHAMPAGNE.

Four *Middle*; BRETAGNE, O-rleanois, BOURGOGNE, L-ionnois.

Four *Southern*; GUIENNE with Gaſcony, LANGUEDOC, DAUPHINY, P-rovence.

To which may be added the other Countries comprehended within the Compaſs of *Old Gaul*, viz.

LORRAIN, Eaſt of *Ch*ampagne.

SAVOY, Eaſt of *Bur*gundy and *Da*uphiny.

SWITZERLAND Eaſt of Franche *C*-ompte.

Franche COmpte, Eaſt of *B*-urgundy.

FRA = P Nor-I-Cham; Brét-O-Bou L; Gui-La-DaP. Lor*Ch* Sav*BuDa* Swi*C* Co*B*.

TABLE IV.

The Particular Deſcription of Southern EUROPE.

I. SPAIN (excluding *Portugal*) may be divided *into two* general Parts:

Northern,

Northern; containing Eight Provinces, *viz.* Gallicia, A-ſturia, Biscay, N-avarre, Aragon, Catalonia, Leon, Castile *vetus*.

Southern; Containing Five Provinces, *viz.* Castile *nova*, Valencia, Andaluſia, Murcia, G-ranada.

SPA = Gál-A-Biſc-N-Ara-Cat Le-Cas*vet* Cas*no*-Val And-MurG.

II. *ITALY* may be diſtinguiſhed into

Northern, or Lombardy; Containing Piedmont, Montſerrat, Milan, Republick of G-enoa, Republick of Venice, Mantua, Parma, Mirandula, Modena.

Southern; Republick of Lucca, Duchy of Tuſcany, the Papacy or States of the Church, Kingdom of Naples.

IT = Lom (= Pi-Mont-MilG VenManPa-MiMód) Lu-Tu Pap-Nap.

III. *TURKY* in EUROPE may be diſtinguiſh'd into,

Northern; Containing Bessarabia, Croatia, D-almatia, BOſnia, Servia, Bulgaria.

Southern; Containing Albania, Macedonia, Romania, Canina, Janna, Livadia, Morea.

TABLE IX.

LATITUDE *and* LONGITUDE *of the most remarkable Places.*

To the Beginning of the Name of the Place is added a *Technical* Ending, consisting of three or four Letters

* Part of *Canada.*

Letters, the two firſt whereof denote the Latitude; the other the Longitude: Thus,

Stock*lou ak*, i. e. STOCKholm in the 59th Degree of Latitude, and 18 of Longitude; *lou* ſtanding for 59, according to the general Key, and *ak* for 18. But note here, that you are not to ſuppoſe this is the *exact* Longitude and Latitude of the Place, becauſe here are no Minutes taken Notice of, which would perhaps be a Nicety not worth remembring: But that the Latitude is between 59 and 60, and the Longitude between 18 and 19. * And that you may be ſure not to be miſtaken above a Quarter of a Degree, 'tis farther to be obſerv'd, that if of the two Letters, which ſignify the Longitude and Latitude, the firſt is a *Conſonant*, as in *lou*, in that Caſe, tho' the Longitude, *&c.* is between 59 and 60, yet it is nearer to 60 than it is to 59, and conſequently 59 Degrees 30 Minutes at leaſt, if not more. If the firſt Letter is a *Vowel*, as in *ak*, though it is between 18 and 19, yet 'tis nearer to the *leſſer* Number, and conſequently 18 Degrees and *under* a half; as the true Longitude of *Stockholm* is 18 Deg. 22 Min. the true Latitude 59 Deg. 30 Min.

TABLE X.

Distance of Chief Cities, &c. from London, *in* English *Miles.*

To the Beginning of the Name of the Place there are two or three Letters added, which are to be supplied with a Cypher at the End; it being thought sufficient to give a round Number, instead of being too exact, especially in a Matter wherein the best Geographers themselves are not agreed; as,

[Madr*eis*] MADRID distant from *London* 86 *sc.* 860 Miles. COPENHAGEN [Cop*sa*] distant about 61, *sc.* 610. GENEVA [Genev*os*] distant *os* 46, *sc.* 460 Miles; and so of the rest, only PARIS [Par*del*] 225.

Note. That the Computations are made at the Rate of 69½ Miles to a Degree, which is certainly neareſt the Truth, and are therefore about one Part in ſeven more than in Mr. *Templeman*'s Tables, who computes by Geometrical Miles, or 60 to a Degree.

Diſtances from London.

TABLE XIV.

Antient EUROPE, ASIA, *and* AFRICA.

I. Antient *EUROPE*, by Way of Accommodation to the preſent Diviſions of it, may be divided into,

1. *Northern*; Containing SCANDINAVIA, FENINGIA, Part of SARMATIA, CIMBRICA Cherſoneſus, CODANONIA Inſula.

2. *Middle*; Containing GERMANIA, the reſt of S-armatia, G-allia Tranſalpina or Celtogalatia, RHOETIA, V-indelicia, NORICUM, Part of PANNONIA, D-acia.

3. *Southern*; Containing IBERIA, ITALIA, the reſt of P-annonia, ILLYRICUM, MOESIA, G-ræcia, THRACIA.

EUR=Scá-Fe Sarm Cimb-Cod; Ger-S G-Rhœ-V-No-Pa-D; Ib-Ita-Plll-MœG-Th.

II. *ASIA*

II. *ASIA Antiqua* may be divided into,

1. *Northern*; Containing SCYTHIA Aſiatica, SOGDIANA; COLCHIS, IBERIA, ALBANIA.

2. *Middle*; Containing Asia *M*-inor, ARMENIA; SYRIA, MESOPOTAMIA, ASSYRIA, MEDIA, HYRCANIA, BACTRIANA, ARACHOſIA; BABYLONIA, SUSIANA, PARTHIA, ARIA, DRANGIANA; PERSIS, CARAMANIA, GEDROſIA, N-orth Part of INDIA, SERICA, SINÆ.

3. *Southern*; Containing ARABIA, the two P-eninſula's of INDIA.

AS = ScythiSogd Col-ib-alb; As*m*-Arm Sy-mes-aſſ-med-hy-BactArch.
Bab-Sus-parth-AriDran Pers-Car-Gedro N.Ind-Se Sin; Ar-P-Ind.

III. *AFRICA* was anciently divided into,

1. *Northern*; Containing MAURITANIA T-*ingitania* and CAES*arienſis*, NUMIDIA, AFRICA *propria*, LIBYA (comprehending CYRENAICA and MARMARICA) E-gypt; GAETULI, GARAMANTES, NASAMONES, PSYLLI.

2. *Middle*; Containing LIBYA *deſerta* or *interior*, comprehending the ATLANTES, PHAURUſII, NIGRITÆ, NUBII, ÆTHIOPIA.

3. *Southern*; Containing the LEUCAETHIOPES, EREMBI or Troglodytæ, BLEMMYES.

AF = Mau*T*-*Cæs*-Numid-A*ſp*-Liby-(Cyr-mar)-E; GætGara-NasPſyl.
Liby*des* AtlántPhauNig-Nub-Æth; Léucæth-Erem Blem.

TABLE XV.

Antient ITALY *and* GREECE, ASIA Minor, SYRIA *and* PALESTINE.

I. Antient *ITALY* may be diſtinguiſh'd into two general Parts; *Gallia Ciſalpina* to the North, and *Italy*, primarily ſo call'd, to the South.

The ſeveral People of Gallia CISALPINA were theſe:

* LIGURES, TAURINI, SEGUſIANI, SALAſſI, LEPONTII, EUGANEI, RHAETI, CARNI, Istri, VENETI; (South of the P-o theſe) A-nanes, BOii, LINGONES, SENONES; North of the Po theſe, LIBICI, LAEVI, INSUBRES, OROBII, CENOMANI.

ITALIA, primarily ſo call'd, or the South Parts of *Old Italy*, comprehended theſe following Countries and People:

† ETRURIA, or Tyrrhenia, SABINI, LATium, CAMPANIA, PICENTINI, G-ræcia magna; ‡ UMBRIA, PICENUM, V-eſtini, MARUCINI, FRENTANI, APULIA; ‖ MARSI, PELIGNI, SAMNIUM, HIRPINI.

CIS = Lig-Tau-Sé-Sa-lep-Eug-Rhæt-Car-Is Vén (P) A-Bo-Ling-Sen.
Lib-læv-Ins-óro-cen ———
IT = Etru-Sab-Lá-Ca-Pi-G Um-Pí-V-Ma-Fr-Ap Mars-PeliSamn-Hirp.

II. Antient *GREECE* was uſually divided into five general Parts, *viz.* MACEDONIA, THEſſALIA, EPIRUS,

---

* Lying in Order along the *Alps*.
† Lying in Order on the *Mare Inferum*.
‡ *Lying in* Order on the *Mare Superum*.
‖ *In the Inland* Parts.

PIRUS, HELLAS or *Græcia* properly ſo call'd, and PELOPONNESUS.

GRAE=MáTh Epir-HelPel ———

1. PELOPPONNESUS was divided into ſix Parts or Regions, *viz.* * ACHAIA, ELIS, MESSENIA, LACONIA, ARGIA or Argolis, † ARCADIA.

—— PELOP=Ach-Eli-Méſſ-Lac-Ar-Arcad.

2. EPIRUS contain'd theſe People and Countries; *viz.* CHAONES, DRYOPES, THESPROTII, CASSIOPÆI, AMPHILOCHI, ALMENE, MOLOSSI, ACARNANIA.

EP = Chao-Dry Theſprot-Caſſ-Amphiloc Al-Mol Acarnan.

3. *Hellas*, or GRAECIA PROPRIA (call'd alſo *Achaia*) was divided into eight Parts, *viz.* DORIS, LOCRIS *Epicnemidia*, ÆTOLIA, LOCRIS *Ozolæa*, PHOCIS, BOEOTIA, MEGARIS, ATTICA.

GRAE-PROPRI = Dó-Locr*ep* Æto-Locróz-pho-bœ meg-att.

4. THESSALIA contain'd theſe ſeveral Parts, *viz.* PELASGIOTIS, ESTIOTIS, THESSALIOTIS, PTHIOTIS, M-agneſia.

THESS = PelasEſtThéſſ-Pthi-M ———

5. Some of the more remarkable People and Countries of MACEDONIA, were TAULANTII, PAEONES, MYGDONIA, ÆMATHIA, AMPHAXITIS, PIERIA.

—— MACE=Taul-Pæo-mygd-æmath-AmphPi.

---

* Lying in Order on the *Ionian*, *Ægean* and *Cretan* Sea.
† In the Inland.

Asia *m-inor* comprehended Asia *p-ropria*, BITHYnia, POntus, GALatia, * CAPPadocia; — LYCIA, PAMPHYlia, CILICIA.

Asm=Asp-Bith-Pó-Ga-Capp. Lyci-pamphy-cil —

Asia *p-ropria* contain'd PHRYGIA *minor*, MYSIA *minor*, Myſia *m-ajor*, ÆOLIS, IONIA, LYDIA, PHRYgia *major*, CARIA, DOris.

Asp = Phrygi*min*-Myſi*miM* Æol-Ioni-Lyd-phry*ma* CarDo.

GALatia comprehended PONTUS GALATICUS, PAPHlagonia, GALATIA *p-ropria*, Isauria, and Part of PISIDIA, the other Part of which, with the Regions of *Carbalia*, was contain'd in *Pamphylia*.

——— Gal=PongalaPaphGalap Is-pis.

SYRIA was divided into four Parts, SYRIA *p-ropria*, PHOENICIA, COELOſyria, PALEſtina.

PALEſtine was diſtinguiſh'd into GALILÆA, SAMARIA, JUDÆA, PERÆA or *Judæa* beyond *Jordan*, IDUMÆA.

SYR = SyrpPhœn-CœloPal. PAL = GálSama Judæ-Per Idum.

TABLE XVI.

Antient GALLIA, GERMANIA, IBERIA, BRITANNIA.

1. GALLIA was divided by *Auguſtus* into four Parts or Provinces, *viz.* *Gallia* BELGICA, *Gallia* CELTICA or *Lugdunenſis*, *Gallia* AQUITANICA, and *Gallia* NARBONENSIS. [Gall=BelCeltAquiNarb]

2. The

* Among the ſeveral Regions of *Cappadocia* was *Lycaonia*.

2. The Inhabitants of ancient GERMany were comprehended under four general Denominations, *viz.* INGævones, VANDali, ISTævones, HERMiones [GERM = Ing-Vand Ist-Her]

3. IBERIA, or ancient *Spain*, was distinguish'd into three general Parts, *viz.* TARraconensis, Lusitanica, B-œtica [IBERI = TarLuB]

4. BRITannia, according to the last Division by the *Romans*, was distinguish'd into five Parts, *viz.* VALencia, MAxima *Cæsariensis*, BRITannia *secunda*, FLAvia *Cæsariensis*, BRITannia *prima* [BRIT = Val Max Brit*se*-Fla Brit*prim*]

GALL = BelCeltAquiNarb GERM = Ing-Vand Ist-Her I = TarLuB.
——— BRIT = ValMax Brit*se*-Fla Brit*prim*.

GEOGRAPHIA SACRA.

TABLE XX.

The Plantation of the Earth after the Flood.

And Firſt, The ſeveral Countries mentioned in Holy Scripture, and denominated from ſome of the Poſterity of *SHEM*, viz.

OPHIR, conjectured to be Part of the *Eaſt Indies*, viz. Aurea *Cherſoneſus* of the Ancients [Ophchers] Havilah,

HAVILAH, Part of *Su*ſiana and *Car*amania [Ha-vi*ſus-car*]

ELAM, Part of *Su*ſiana and *Per*ſis [Ela*ſus-pers*]

ASSHUR, or *Aſſyria* properly ſo call'd, into which *Nimrod* is ſaid to come and build *Nineveh*, &c. [Aſhur]

ARAM, Part of *Sy*ria and *Me*ſopotamia [Arám-*ſy-mes*]

Land of UZ, Judæa *p*eræa, and the adjoining Parts of ARAbia *de*ſerta and Petræa. [Uzjúp-ara*d*]

LUD, or *Lyd*ia, in Aſia minor [Lud*lyd*]

Oph*chers* Havi*ſus-car* Ela*ſus-pers* Aram*ſy-mes* Aſhur. Uzjúp-ara*d* Lud*lyd*———

Countries mention'd in the Scripture, and denominated from the Poſterity of *JAPHET*, (eldeſt Son of *Noah*) whoſe Family is ſuppoſed to have peopled, beſides a conſiderable Part of *Aſia*, all *Europe*.

MADai, call'd by Heathen Writers Media [Mad]

GOMER, thought to be *Alb*ania, on the Euxine Sea [Gomer*alb*]

TOGArmah, *Cap*padocia [Toga*cap*]

ASHKENAZ, *Ph*rygia [Aſhke*ph*]

TUBal, *Iberi*a in Aſia [Tub*iberi*]

MESHECH, the Country lying about the Montes *Moſchi*ci, between Colchis and Armenia major. [Meſhéch*moſch*].

MAGog, the Parts of *Scythi*a adjoining to the Plantations of *Meſh*ech, Tubal and Gomer [Mag*ſcythi-meſh*]

JAVan, ancient *Gree*ce [Jav*gree*]

ELISHah, or the Iſles of Eliſha, the Iſles of the *Archi*pelago [Eliſh*arch*]

KITTim underſtood of *Ita*ly, Dan. xi. 30. and *of Macedo*nia in the Book of Maccabees [Kitt*ita*]

TARSHIſh,

TARSHIſh, by *Joſephus* underſtood to be *Cili*cia, by others Old Spain, by others Carthage [Tarſh*cil*]

Mad Gomer*alb* Toga*cap* Aſhke*ph* Tubi*béri* Meſhéch-*moſch.*
Mag*ſcythi-meſh* Jav*gree* Eliſh*arch* Kitt*ita* Tarſh*cil.*

Countries mentioned in Scripture, denominated from the Poſterity of *HAM* (youngeſt Son of *Noah*) whoſe Family peopled *Africa*, with the adjoining Parts of *Aſia*.

Land of CUSH, (commonly render'd *Æthiop*ia) under which Name ſeems to have been contain'd moſt of Arabia, diſtinguiſhed into ſeveral Parts, denominated from the Poſterity of Cuſh, as,

SHEBA, *Ara*bia *F*elix [Sheb*ara-F*]
HAVilah, Part of *Ara*bia *de*ſerta, next to Babylonia [Hav*ara-d*]
RAamath and DEDan, Parts on the *Per*ſian *Gulf* [Ra-déd*pe-gu*]

MIZRaim, or *Æ*gypt [Mizr*Æ*]
LUB or Lybim, that is, Libya properly ſo called [Lub]
PHUT, the more remote Parts of *Lib*ya largely taken [Phut*lib*]
Land of CANAan lying between the River *Jor*dan and the *Me*diterranean [Cána*jor-M*]
Land of HAMATH, North Part of *Phæ*nicia, and adjoining Parts of *S*yria propria [Hamath*phæn-S*]
ARVad, or Arpad, or the Iſle Aradus, lying over-againſt *Hama*th [Arv*hama*]
Land of the PHILiſtines, *Pale*ſtine proper [Phil*pal*]

Cuſh*æthiop* [Sheb*ara-F* Hav*ara-d* Ra-déd*pe-gu*] Mizr*Æ*.
Lub Phut*lib* Cana*jor-M* Hamath*phæn-S* Arv*hama* Phil*pal.*

TABLE

TABLE XXI.

Diviſion of the Holy Land.

The Kingdom of *JUDAH* contained the Tribes of Judah and B-enjamin [Ju-B]

The Kingdom of *ISRAEL* contained the Tribes of

A-ſher, NEPHTALI, ZEBULON, Iſsachar, Half of MANASSEH, DAN, E-phraim, SIMEON } Weſt of Jordan

REUBEN, G-ad, the other Half of M-anaſſeh } Eaſt of Jordan

The ſeven Nations were the CANAANITES, the GIRGASHITES, the HITTITES, the HIVITES, the AMORITES, the JEBUSITES, and the P-erizzites.

ISR = A-NeZe -M IſsMa -G Dan-E -Réub Si: Ca-Girg-hit-hiv Am-Je-P.

The Diviſion of the Holy Land in the New Teſtament, *compar'd with the Diviſions thereof among the Twelve Tribes in the* Old Teſtament.

GALLilee contain'd A-ſher, NEPHTALI, Z-abulon, and Issachar [GALL = A-NeZIſs]

SAMaria contain'd EPHraim, with the Half of MANASSEH [SAM=ManEph]

Judæa contain'd DAN, Parts of SIMEON and Judah with B-enjamin [Ju=Dan Si-Ju-B]

IDUMÆA contain'd the South Parts of SIMEON and J-udah, and ſome Part of the Land of E-dom [ID=Si-J E]

PERÆA contain'd R-euben, GAD, and the other Half of M-anaſſeh [PER=MGaR]

GALL=A-NeZIſs. SAM=ManEph. Ju=Dan Si-*Ju-B.* ID=Si-J E. PER=MGaR.

The

The Land of EDOM bordered on the South of *Judæa* [Edóm*Sjud*]

The Land of the MOABites lay on the *N. E.* of *Edom* [Móa*NEed*]

The Land of the AMMONITES lay on the *N. E.* of *Moab* [Am*NEmoab*]

The ISHMAELITES, MADIANITES, and AMALEKITES, liv'd promiſcuouſly together, and therefore ſeem to be denoted by the common Name of the Mingled People, or *Arab*ians, from ערב *miſcuit*, from whence the Greek Appellation of Ἄραψ, or Ἄραβες. [Iſh-mad-am*arab*]

Edóm*Sjud* Móa*NEed* Am*NEmoab* Iſh-mad-am*arab*.

TABLE XXII.

The moſt remarkable Rivers, with the Places where they riſe, and the Seas into which they fall.

In EUROPE.

The WOLGA, the greateſt River in *Europe*, riſes in *Moſcovy*, and falls into the *Caſpian* Sea [Wol*mo-ca*]

The DANUBE riſes in *Swabia*, and falls into the *Euxine* Sea [Dan*ſwab-eux*]

The RHINE riſes in the Country of the *Griſons*, and falls into the *German Ocean* [Rhin*griſ-gerO*]

The VISTULA, or *Weyſſel*, riſes in *Poland*, and falls into the *Baltick* [Viſt*po-ba*]

The NIEPER riſes in *Poland*, and falls into the *Euxine* Sea [Nie*P-eux*]

The DWINA riſes in *Moſcovy*, and falls into the Gulf of the Northern Ocean, call'd the *White* Sea [Dwin*mo-whi*]

The TAIO in *Spain*, falls into the *Atlantick Ocean* [Tai*ſp-atl-oc*]

The IBERUS, or *Ebro*, in *Spain* } fall into the
The RHODANUS, or *Rhoſne*, in *France* } *Med*iterranean [Ib-Rhod*med*]

The ELBE in *Germany* falls into the *Ger*man *Ocean* [Elb*ger-oc*]

The ODER in *Germany* falls into the *Balt*ick [Od*bált*]

In ASIA.

T-igris and EUPHRATES riſe in *Arm*enia major, and having join'd Streams on the South Eaſt of *Meſopotamia*, fall into the *Si*nus *P*erſicus [T-Eup*harm-ſiP*]

JORDAN riſing in the Border of *Neph*tali, and paſſing through the Lake of *Genneſaret*, falls into the *Salt* Sea [Jord*neph-ſalt*]

GANGES in *I*ndia falls into the Bay of *Beng*al [Gán-*I-beng*]

In AFRICA.

The NILE, running through the Middle of *Egypt*, falls into the *Medi*terranean [Nil*medi*]

The NIGER runs through *Negroland* into the *Atlantick* Ocean [Nig*at*]

The Memorial Lines.

PONDERA, NUMMI, MENSURÆ.

SECT. V.

The Application of this Art to Coins, Weights, and Meaſures.

THE Beginning of the Words is compoſed of the Initial Letters; thus At-ta ſtands for Attick Talent, Het for Hebrew T-alent; Ad for A-ttick D-rachm; Ald for Alexandrian D-rachm; HetO for Hebrew Talent of Gold; (Het ſtanding for Hebrew T-alent as before, and O for *Or*, or Gold) RoL for ROman L-ibra, Den for Denarius, Shek for Shekel, GreF for Grecian F-oot, HeC for Hebrew C-ubit, RoF*q* for ROman F-oot Square, *&c.*

The *Italick* Endings of the Words repreſent the Number of Pounds, Shillings and Pence, which are ſeparated from each other by *Hyphens*, or elſe ſignified by the *Roman* Letters l. s. d. The double Lines denote Equality. Thus Am = dr*ag* = *t-ei-n*, ſignifies that an A-ttick M-ina, which is equal to 100 Drachms, was 3 Pounds 8 Shillings and 9 Pence. The Let*ters*, though ſeparated, are to be pronounced together;

ther; as *t-ei-n tein*. The Reader is to be reminded here that *re* ſignifies ½, *ro* ¼, &c. according to the general Rule, *pag.* 5. But *Note*, that inſtead of the Fraction *re*, the Letter *h* is ſometimes uſed for Half, as *oikbe-h* = 7812 ½ *ſc.* 7812 Pounds 10 Shillings.

Joſephus, makes the *Jewiſh* Bath equal to the Attick ΜΕΤΡΗΤΗΣ, and conſequently the Log equal to the ΞΕΣΤΗΣ. Dr. *Arbuthnot* has given us Tables according to both, but ſeems to prefer Biſhop *Hooper's* Account to the other.

TABLE VII.
WEIGHTS.

N. B. L or Li ſtands for Libra or Pound, Oz for Ounce, Lit Pound T-roy, L-aver Pound AVERdupois.

A Pound Troy = 12 Ounces [Lít = Oz*ad*]

An Ounce Troy = { 8 DRAms [=Dr*ak*] / 24 SCRuples [=Scr*ef*] / 20 P-enny Weights [P*ez*] / 480 GRAins [=Gra*fky*] }

* A Pound Averdupois = { 16 Ounces [= Oz*as*] / 256 DRams [= Dr*els*] }

Lít = Oz*ad* Oz = Dr*ak* = Scr*ef* = P*ez* = Gra*fky*
Lav = Oz*as* Lav = Dr*els*]

	GRains Troy.
Pound T-roy [Lit = Gr*upauz*]	5760
Ounce Troy [Oz = *oky*]	480
DRom [Dr = *auz*]	60
PENny Weight [Pen = gr*ef*]	24
SCRUple [Scrup = *dy*]	20
† Pound Averdupois [Lav = *oith*]	7000
Ounce Averdupois [OzAv = *otoi*]	437. 5

---

* According to the Proportion laid down by Mr. *Greaves*, *viz*, that the Averdupois Pound is to the Troy Pound as 175 to 144. In Dr. *Arbuthnot's* Tables it is as 17 to 14, which is a very inconſiderable Difference, being but $4\frac{3}{7}$ Grains leſs in the Pound.

† Mr. *Ward* ſays, that by a very nice Experiment, he found, that one Pound Troy is equal to 14 Ounces 11 Penny-Weight and $15\frac{1}{2}$ Grains Troy, which is 6999 $\frac{1}{2}$ Grains; differing but half a Grain in the Pound from Mr. *Greaves*. *Math. Guide*, Part I. C. 3.

Lit = Gr*upauz* Oz = *oky* Dr = *auz* Pen = gr*ef* Scrup = *dy* Lav = *oith*que.

Ancient WEIGHTS.

Attick Talent = { 60 M-inas [= *Mauz*] / 6000 Drachms [= *Drauth*]

Hebrew Talent = { 3000 Shekels [= *Shith*] / 60 M-anehs [= *Mauz*]

Shekel = { 2 Bekahs [= *Beke*] / 4 Zuzas [= *Zuf*] / 20 G-erahs [= *Gez*]

---

* So Biſhop *Cumberland* from the Rabbinical Accounts. But Biſhop *Hooper*, from *Philo* and *Joſephus*, makes it equal to the Attick *Stater* or Tetradrachm = 68 ,4 × 4, or 67 × 4 Grains.

† According to the Weight of the Standard Mina of *Solon*. Biſhop *Hooper* ſuppoſes, that whilſt the Money Drachm fell gradually from 68 ,4 to 62 ,57 Grains, the Ponderal Drachm continued ſtill the ſame, which I have therefore here retain'd. Dr. *Bernard* lays the middle Sort of Attick Drachms at 66 Grains, which (Table I.) are accordingly valued at 8*d.* $\frac{1}{2}$. But the Weight of the Attick Drachm, under the firſt *Roman* Emperors, and for ſome conſiderable Time before, was about 62 ,57 Grains; and upon this Drachm, and the Equality of it with the *Roman* Denarius, moſt of the Computations in Claſſick Authors are founded.

‡ The Common Attick Mina was ſuppoſed equal to 12 $\frac{1}{2}$ *Roman* Ounces. The Mina Medica was 16 *Roman* Ou· and exactly the Weight of our Averdupois Pound.

Decimal

Decimal Tables for the more eaſy Reduction of ancient Coins, Weights, and Meaſures.

Thoſe who underſtand Decimal Arithmetick will, I hope, excuſe me, if for the Sake of ſuch as are unacquainted with it, I lay down two or three Obſervations, in order to make the following Tables more generally uſeful;

Firſt, That the Denominator of every Decimal Fraction is an Unit, with as many Cyphers as there are Places of Numbers in the Fraction; thus ,5 ſignifies $\frac{5}{10}$, 05 ſignifies $\frac{5}{100}$, 005 ſignifies $\frac{5}{1000}$, *&c.*

Secondly, That the nine Figures at the left Hand of each of the Tables may ſtand either for Units, or, by the ſuppoſed Addition of one, two, three, or more Cyphers, for Tens, Hundreds, Thouſands, *&c.*

Thirdly, That if the ſaid nine Figures are ſuppoſed to ſtand for one, two, three, four, *&c.* then the Decimals ſtand as in the Table: If for ten, twenty, thirty, forty, *&c.* or for one Hundred, two Hundred, *&c.* then for every ſuch ſuppoſed Addition of a Cypher, one Figure in the Place of Decimals is to be added to the Place of Integers.

Thus, a *Jewiſh* Cubit is equal to 1 *Engliſh* Foot, and 824 Thouſandth Parts of a Foot.

		Feet decim.
1 Cubit	=	1 ,824
10 Cubits	=	18 ,24
100 Cubits	=	182 ,4
1000 Cubits	=	1824

If there are not Places enough of Decimals to anſwer, they muſt be ſupplied with Cyphers:

			lib. decim.
Thus,	1 Attick Talent	=	206 ,25
	10 Attick Talents	=	2062 ,5

100 At-

100 Attick Talents = 20625
1000 Attick Talents = 206250 *&c.*

But as the common Computation in Classick Authors is by Sesterces and Drachms, I shall exemplify more particularly the foregoing Observations in the two Tables drawn up for them.

SESTERCE = 1 *d.* 3 *f.* ¾ in Decimal Fractions of a Pound Sterling = ,00807291667
[Sest = *zykypenassoi*]

A-ttick D-rachm, or Roman Denarius, = 7 *d.* 3 *f.* in Decimal Fractions of a Pound Sterling = ,032291667
[AD = *zidenassoi*]

1 Sestertius.	Decem Sestertii or Nummi. Centum Sestertii. Sestertium or 1000 Sestertii. Decem Sestertia or 10000 HS. Centum Sestertia or 100000 HS. Decies Sestertium or 1 Million HS. Centies Sestertium or 10 Millions HS. Millies Sestertium or 100 Millions HS. Decies Millies or 1000 Millions HS. Centies Millies or 10000 Millions HS. Milliès Millies or 100000 Millions HS.
1	,00807291667
2	,01614583333
3	,02421875000
4	,03229166667
5	,04036458333
6	,04843750000
7	,05651041667
8	,06458333333
9	,07265625000

1 Drachm.	10 Drachms. 100 Drachms or 1 Mina. 1000 Drachms or 10 Minæ. 1 Myriad (= 10000 Dr.) or 100 Minæ. 10 Myriads (= 100000 Dr.) or 1000 Minæ. 100 Myriads (= 1 Million Dr.) or 10000 Min. 1000 Myriads (= 10 Mill. Dr.) or 100000 Min. 10000 Myriads of Drachms, or Myr. of Myriads. 10 Myriads of Myriads of Drachms.
1	,032291667
2	,064583333
3	,096875000
4	,129166667
5	,161458333
6	,193750000
7	,226041667
8	,258333333
9	,290625000

According

According to the Obſervations before laid down, it is evident that

		lib.
1 Seſtertium,	or 1000 HS. =	008 ,07291667
2 Seſtertia,	or 2000 HS. =	016 ,14583333
3 Seſtertia,	or 3000 HS. =	024 ,21875

And ſo down to 9 Seſtertia; the three firſt Figures of the Table being Integers, the reſt Decimals. So,

	lib.
*Decies Seſtertium, or 1 Mill. HS. =	8072 ,91667
Vicies, or 2 Million HS. =	16145 ,83333
Tricies, or 3 Million HS. =	24218 ,75 *&c.*

Hence it appears, that the Value of moſt of the Sums mentioned in Claſſick Authors may be diſcover'd from the Tables at firſt Sight; the reſt by the Help only of Addition. Thus,

What is the Value of Centies Quinquagies HS?

	lib. *decim.*
Centies HS. =	80729 ,1667
Quinquagies =	40364 ,5833
Centies Quinquagies =	121093 ,75

What is the Value of 375 *Attick Drachms?*

300 Drachms =	9 ,6875
70 Drachms =	2 ,26041667
5 Drachms =	0 ,16145833
375 Drachms =	12 ,109375

* With the numeral Adverb *Centena Millia* is always underſtood.

What is the Value of 51 *Myriads of Drachms?*

50 Myriads	=	16145 ,83333
1 Myriad	=	322 ,91667
51 Myriads	=	16468 ,75

Note. That the Table for Drachms or Denarii, will alſo ſerve for Minæ and for *Aſſes*, remembering that a Denarius is equal to 10 Aſſes, and a Mina to 100 Drachms. Thus,

	lib. decim.
Æris (ſc. Aſſium) Millia X = 1000 Denarii =	32 ,291667
Æris Millia XXV = 2500 Denarii =	80 ,72916
Æris Millia LXXV = 7500 Denarii =	242 ,1875

I beg the Reader's Pardon if I have been too particular, but was willing to have the Tables perfectly underſtood: what has been already ſaid will eaſily be applied to thoſe which follow.

*Attick Drachm = 8 *d.* $\frac{3}{4}$		* Attick Talent = 206 *l.* 5 *s.*		† Attick Talent = 193 *l.* 15 *s.*

MIS-

MISCELLANEA.

SECT. VI.

The Proportion of the Diameter to the Circumference of a Circle; The Area of a Circle and Ellipsis; The Surface and Solidity of a Sphere.

Diameter : Periphery : : 7 : 22. [Di : peri : : *p* : *ed*] or : : 113 : 355. or more exactly the Diameter : Periphery : : 10.000,000 : 31.415,929.

Di : peri : : *p* : *ed* : : *bat* : *ilu* : Dia : priph : : *azmil* : *ta-ful-oudou.*

According to *Van Ceulen*, who carried the Proportion to six and thirty Figures, which in Memory of so laborious a Work, were engraven upon his Tomb at St. *Peter's* in *Leyden*; the Diameter : Periphery : : 2 :

Quintil.	Quadr.	Tril.	Bil.	Mil.	Un.
6,28,318.	530,717.	958,647.	692,528.	676,655.	930,575.
s,cktak	*uiz-pap*	*nuk-sop*	*sne-lek*	*aups-sul*	*auiz-tais.*

The

The Diameter multiplied by 3 ,1416 gives the PERIPHERY [Diperi ,*bobs* dat priph] Conſequently the Periphery divided by 3 ,1416 gives the Diameter.

The AREA of a Circle is given by multiplying the SQUARE of the D-iameter into 0 ,7854.

Datur Area SquaD per *y,peilo.*

The AREA likewiſe is given by multiplying the fourth Part of the Diameter into the PERIPHERY. [Ar = *rodi* x pe]

The AREA of an ELLIPSIS is given by multiplying the Rectangle of the TRANSVERSE and CONJUGATE DIAMETERS into 0, 7854.

Area fit Ellips. Dia-tran-con duct. in *y,peilo.*

The SURFACE of a Sphere is given by multiplying the PERIPHERY into the D-iameter [Surf = pe x D]

The SURFACE of a Sphere is alſo given by multiplying the AREA of its largeſt Circle into 4. [Surf = áre x *o*]

The SOLIDITY of a SPHERE is given by multiplying $\frac{1}{3}$ of the RADIUS into the SURFACE. [Sol-ſphe = *rirad* x ſur]

The Memorial Lines.

Di : peri : : *p* : *ed* : : *bat* : *ilu.* Dia : priph : : *azmil* : *ta-fal-oudou.*

: *s,ektak uïz-pap nuk-ſop ſne-lek aup-ful ouïz-lois.*

Diperi,*bobs* dat Priph. datur Area ſquaD per *y,peilo.*

Area fit Ellips. Dia-tran-con duct. in *y,peilo.*

Ar = *,rodi* x pe Surf = pe x D Surf = áre x *o* Sol-ſphe = *,rirad* x ſur.

The

The Quantity of Vapours raiſed out of the Sea, eſtimated by Dr. Halley. *Vide* Miſcel. Curioſ. *Vol.* I.

The MEDITERRANEAN, ſuppoſed to be equal to 160 Square DEGREES, is computed to yield in Vapour *per Diem* 5280 MILLIONS of T-ons [Med = *dég-bauz* = *lék*-milT]

The THAMES is computed to carry down in a Day, *ſc.* 24 Hours, into the Sea 20.300,000 TONS [Tham = *ez-igth*-ton]

The Rivers (FLUVII) which run into the MEDITERRANEAN are computed to carry 1827.000,000 Tons, which is little more than $\frac{1}{3}$ of what is raiſed in Vapour [Fluv-med = *aké*-milT]

The Computations are made thus:

By Experiment it appears, that each SQUARE F-oot of the Surface of Water yields in Vapour *per Diem* HALF a PINT [SquaF = ha-pin]

Each Space of four Foot Square (= 16 SQUARE F-eet) yields a GALLON [*aſ*squaF = gal]

A MILE Square 6914 TONS [Mil-*ſnaſ*-ton]

A Square DEGREE (of 69 *Engliſh* Miles) 33.000,000 Tons [Dég (mi-*ſou*) *tim*-ton]

The *Mediterranean* = 160 Degrees = 5280.000,000 Tons as above.

SquaF = ha-pin *aſ*squaF = gal Mil = *ſnaſ*-ton Dég (mi-*ſou*) *tim*-ton.

The Quantity of Water the Mediterranean *receives from the Rivers that fall into it, is eſtimated thus:*

The moſt conſiderable Rivers that run into the *Mediterranean* are the EBRO, the RHONE, the TIber,

ber, the PO, the NILE, the DON or *Tanais*, the NIESTER, the NIEPER or *Boryſthenes*. Each of theſe is ſuppoſod to carry down ten Times as much Water as the *Thames*: Not that any of them is ſo great, but ſo to allow for the ſmall Rivers that run into that Sea. Now the Water of the THAMES being computed at about 20.300,000 Tons as above, the nine Rivers aforeſaid each will amount to 203.000,000; in all 1827.000,000 T-ons.

Thám=*ez-igth*T Ib-rho-ti-po Nil-don Nieſt-nieper-*akep*-milT.

The Water of the Thames *is computed thus:*

'Tis ſuppoſed to run at *Kingſton* Bridge, where the Tide reaches not, at the Rate of two Miles an Hour, which is 48 Miles in 24 Hours; 48 Miles are equal to 84,480 YARDS. [Mi*ſk*=Ya*ke-feiz*] which being multiplied by 300 Yards, (the PROFILE of Water at KINGSTON Bridge, where 'tis ſuppoſed to be 100 Yards broad and 3 deep) produces 25.344,000 Cubick Y-ards of Water [Ya*ko-feiz* per *ig*=Yél-*tfoth*] which are equal to 20.300,000 TONS [=*ez-igth*ton]

Mi*ſk*=Yáko-*feiz* (Kin-pri*g*] Ya*ko-feiz* per *ig*=Yél-*tfoth*=*ez-igth*ton.

The Velocity of Sound, Light, &c.

A Cannon Bullet (GLOBUS tormento bellico emiſſus) in a SECOND, moves 204 YARDS [In-ſec Glob-ya*rezo*]

Light [Lumen) in a Second moves 200,000 MILES [Lu-mile*gth*]

Sound (SONUS) moves in a Second 1142 Feet (PEDES) [Son-ped-move*tabſe*]

A Cannon Bullet moves a M-ile in 17 HALF SE*conds* [Glob-M-ápha-ſec]

SOUND

Sound moves a Mile in 9 half Seconds $\frac{1}{4}$. [Son*n*,*ro*]

A Cannon Bullet would be in moving to the Sun (Ad Solem) 32 Years $\frac{1}{2}$. [Ad-sol-glob = an-*te*,*re*]

Sound would be in moving to the Sun 17 Years. [Son*ap*]

The Deſcent of heavy Bodies [Deſcenſus gravium) is 16 F-eet $\frac{1}{12}$, or an Inch, in a Second [Deſ-gravi-ſec = *fas*,*rad*] And in more Seconds as the Squares of thoſe Times.

A Pendulum of 39 Inches, 2 Tenths (Pendulum In*tou*,*d*) Oscillates or Vibrates Seconds. [Oſcil-ſec Pendulum In*tou*,*d*]

In-ſec Glob-yare*zo* Lu-mil*egth* Son-ped-move*tabfe*.
Glob-m-*ápha*-ſec Son*n*,*ro* Ad-ſol-glob = *ánte*,*re* Son*ap*.
Des-gravi-ſec = *fas*,*rad* Oſcil-ſec Pendulum In*tou-d*.

Note. That the *Athenians* began their Year from the New Moon, whoſe Full was next after the Summer Solſtice, which was at firſt reckon'd to be upon the 8th of *July*, after on the 27th of *June*. *Vid.* Bev. *Chron. Inſtit.* Lib. I. *Cap.* 12.

Jewiſh *and* Chriſtian *Æra of the Creation.*

Both *Jewiſh* and *Chriſtian* Writers make Uſe of the Æra of the Creation of the World; but there is great Variety of Opinions concerning the Number of Years between that and the Birth of *Chriſt*. That which is moſt generally received is, that the firſt Year of the Vulgar *Chriſtian* Æra commences from the Day of his Circumciſion, *viz.* the Firſt of *January* in the Year of the World 4004, and of the

Julian

Julian Period 4714. The *Jews* place the Creation of the World *later* by about 243 Years, and the *Greek* Hiſtorians, upon the Authority of the Septuagint, *ſooner* by about 1490 or 1500 Years, ſo that

Oct. 7. *Aug.* 27. *Sept.* 1. } of the Firſt Year of the *Chriſtian* Æra } began { the 3762 Year of the *Jewiſh* Æra. / the 5494 of the GREEK Eccleſiaſtical Æra. / the 5509 of the GREEK CIVIL Æra.

* Ταύτην τὴν πίστιν τριακόσιοι μὲν πρὸς τοῖς δικαοκτὼ, ἔγνωσάν τι καὶ ἔστερξαν· καὶ ὡς φησὶν ὁ Εὐσέβιος, ὁμοφωνήσαντες καὶ ὁμοδοξήσαντες ἔγραφον· πέντε δὲ μόνοι ἀπροσδέξαντο, τῆς λέξεως τοῦ ὁμοουσίου ἐπιλαβόμενοι. Εὐσέβιος ὁ Νικομηδείας, &c. Socrat. Hiſt. Eccl. *Lib.* I. Cap. 8.

The

The Electors of GERMANY.

The Archbiſhops of MENTZ, TRIERS and COLOGN, Elector Palatine of the RHINE, the King of BOHEMIA, the Electors of BAVARIA, SAXONY, BRANDENBURG: The Elector of HANOVER was ADDED, *Anno Dom.* 1693.

Ten-Trí-Co-Rhin Bohe-Bav Sax-Branden. Hanover ad *fout.*

The Quinquarticular Controverſy, concerning,

1. PREDESTINATION. 2. Free-Will (LIBERUM Arbitrium.) 3. The Force of divine Aſſiſtance (AUXILIUM.) 4. PERSEVERANCE. 5. The Extent of REDEMPTION.

The *Calvinian* Doctrine upon theſe Points, handed from *Geneva* by the *Engliſh* Refugees, and propagated by CARTWRIGHT in the *Margaret* Profeſſor's Chair at *Cambridge*, was at a Conſultation of ſeveral Prelates and Divines at *Lambeth* digeſted into nine Articles, commonly called the LAMBETH ARTICLES, and agreed upon N-ov. 10, 1595. [*Naz-aloul*] but by Order of Queen *Elizabeth* were immediately recall'd and ſuppreſs'd.

Lamb-Art = Cart *Naz-aloul* Predés-Liber-Auxili-Pers-Red.

The ſeven Precepts of the Sons of Noah *are recorded by the* Jewiſh *Doctors under the following Titles.*

I. To worſhip the true God. [CULTUS *divinus*]
II. To renounce IDOLATRY.
III. To commit no Murder. [CAEDES]

IV. Not to be defiled with Fornication, *&c.* [STUPRUM]

V. To avoid all Rapine, Theft, *&c.* [FURTUM]

VI. To adminiſter Juſtice [JUSTITIA]

VII. Not to eat the Fleſh with the Blood [SANGUIS]

Such Gentiles as were admitted to the Worſhip of the God of *Iſrael*, and the Hope of a Future Life, but were not circumciſed, nor yet conformed to the Moſaical Rites, being only oblig'd to the Obſervation of the foregoing Precepts were call'd Proſelytes of the Gates, in Oppoſition to the Proſelytes of Righteouſneſs, or of the Covenant, who differ'd nothing from the *Jews*, but that they were of *Gentile* Race. *Vid.* Lewis *Heb. Antiq.*

Sept-Præcept = Cul-Idol-Cæd-Stup-Furt-Juſtiti-Sanguis.

MISNAH, GEMARAH, TALMUD.

The MISNAH in 6 B-ooks [Miſna-BI] contained 63 TRACTS [Tr*aut*] into which the Traditions or Oral Law of the *Jews* were methodically digeſted by *Rabbi Judah* HAKKADOSH in the Time of ANtoninus P-ius [Hakad-AnP] As ſoon as it was publiſhed, it became the Subject of the Study of all their learned Men, and the chiefeſt of them both in *Judæa* and *Babylonia* employed themſelves to make Comments upon it; and theſe with the *Miſnah* make up both their *Talmuds*, i. e. the *Jeruſalem Talmud*, and the *Babyloniſh Talmud*. Theſe Comments are called the GEMARah or Complement, the MISNAH the Text; both together the TALMUD [Tal = Miſ-Gema] The JERUSALEM TALMUD was compleated about *A. D.* 300. [Tál-Jeruſ]

The B-abyloniſh TALmud about 500, or in the Beginning of the Sixth Century [Tal-*Bug*] This latter is only in Eſteem amongſt the *Jews*. *Vid.* Prid. *Connect.* p. 328.

Miſna-*Bs* Tr*aut* Hakad-AnP Tal=Míſ-Gema Tál-jer*ig* Tal-*Bug*.

The Diviſion of the Roman *Empire out of the Book called* Notitia Imperii, *ſaid to be written about the Time of* Arcadius *and* Honorius.

The whole Empire was divided into 13 Dioceſes under 4 Praefecti Prætorio, and about 120 Provinces contained in them. [Præf = dibi = pradz]

1. The *Præfectus Prætorio* Orientis, and under him five Dioceſes, *viz.* the Oriental, E-gyptian, A-ſiatick, POntick and Thracian Dioceſes. [Or= L-As-Po-Th]

2. The *Præfectus Prætorio* of Illyricum, and under him two Dioceſes, *viz.* Macedonia and D-acia. [Ill = Ma-D]

3. The *Præfectus Prætorio* of Italy, and under him three Dioceſes, *viz.* Italy, Illyricum, and Africa. [It=It-Il-Af]

4. The *Præfectus Prætorio G-alliarum*, and under him three Dioceſes, *viz.* Hiſpania, Gallia, and B-ritannia. [G=His-Ga-B]

Præſ = Dibi = Pradz = Ill = Ma-D Or = E-As-.
Po-Th It-It-Il-Af G=His-Ga-B.

The Dimenſions of the Ark and Temple.

The Length (LOngitudo) of the ARK 300 Cubits. [Ark-lo-cub*ig*] The BREADTH 50 Cubits. The Height (ALTITUDO) 30 Cubits. [Bruz-Al*iz*]

The Length of the Houſe which K. *Solomon* built for the Lord was 60 Cubits: The BREADTH thereof 20 Cubits, and the Height thereof 30 Cubits, 1 *Kings* vi. 2. [Tem-Lón*ſy*-Brez-Alty] The Length of the PORCH 20 Cubits, the Height thereof 120 Cubits, 2 *Chron.* iii. 4. [Por*ez-bez*]

Ark-Lo-cub*ig*-Bruz-Al*iz*. Tem-Lón*ſy*-Brez-Al*ty*
Por*ez-bez*.

Computation of the Coſt, Veſſels, Veſtments, &c. *of* Solomon's *Temple.*

By *Villalpandus* Computation of the Number of TALents of Gold, Silver, and Braſs, laid out upon the TEMPLE, the Sum amounts to 6904.822,500 *l.* Sterling. [Tal-tem = *ſouzo-ked-ug*] And the Jewels are reckon'd to exceed this Sum.

Veſſels of Gold (VASA AUREA) conſecrated to the Uſe of the Temple, are reckon'd by *Joſephus* 140,000. [Vaſ-aurea*bázth*] Which, according to *Capel's* Reduction of the Tables contain'd in them, amounts to 545.296,203 Pounds Sterling [*lolenâu-dyt*]

The Veſſels of Silver (VASA ARGENTEA) 1.340,000 [Vas-*áratozth*] are computed at 439,344,000. [*fin-toſth*]

Prieſts Veſtments of Silk (VESTES SERICÆ) 10000. [*Veſt-ſericazth*]

P-urple

P-urple Veſtments for Singers 2.000,000. [P*em*] Trumpets 200,000 [T*regth*] Other Muſical Instruments 40,000. [Inſtr*oz*]

Beſides theſe Charges there was that of the other Materials, and of 10,000 Men *per* Month in *Lebanon* to hew down Timber (Sylvicidæ) [Sylvicid*az*] To carry Burthens (Vectores) 70,000. [Ve*ctoiz*] To hew Stones (Lapicidinæ) 80,000 [Lapi*ky*] and 3300 Overſeers (Episcopi) [Epiſcop*tig*] who were all employed for 7 Years (Annis Septem) To whom, beſides their Wages and Diet, *Solomon* gave a free Gift 6.733,977 Pounds. (Donum Solomonis) [*s-paut-noip*] The Treaſure left by *David* towards carrying on this Work (reliquit David) 911.416,207. [*nab-oás-dyp*]

N. B. th is left out, as Sylvicid*az* for Sylvicid*azth*, &c. it being impoſſible to miſtake 10,000 for 10.

Tal-tem = *ſouzo-ked-ug* Vas-aurea*bózth* = *lol-enaudyt.*
Vas-ara*tozth* = *ſin-toſth* T*reg* Inſtr*oz* Veſt-ſericáz P*em.*
An-ſept Sylvicid*az* Lapi*ky* Ve*ctoiz* Epiſcop*tig.*
Don Solomo *s-paut-noip* reliquit Dav-*nab-oás-dyp.*

The Number of thoſe that returned (Reduces) from the Captivity were 42,360 [Redú*ſe-tauz*] beſides Proselytes 7337. [Proſel*oitip*]

The particular Sums in EZra's Catalogue amount to 29,828. [Cat-*ézdou-kek*]

The particular Sums in Nehemiah's Catalogue 31,031. [Cat-nehe*tazib*] How theſe Accounts are reconcil'd, *Vide* the Index to the Bible.

Redu*ſe-tauz* Proſel*oitip* Cat-*ézdou-kek* Cat-nehe*tazib.*

The

The SILVER of them that were numbered of the CONGREGATIONS was a Hundred TALENTS and a Thouſand ſeven Hundred and threeſcore and fifteen SHEKELS after the Shekel of the Sanctuary, a BEKAH for every Man, that is half a Shekel after the Shekel of the Sanctuary, for every one that went to be numbered from twenty Years old and upwards for ſix Hundred Thouſand and three Thouſand and five Hundred and fifty Men. *Exod.* xxviii. 25, 26.

Sil-Con=Talg-Shék*apoil* Bek*ſyt-luz*=Shekel*izappu*.

Difference of Talents.

	Attick Minas.	*At. Drachms*
A SYRIAN TALENT contain'd	15	1500
A PTOLEMAIC Talent	20	2000

---

† According to ſome the *Rhodian* Talent contain'd but 4500 Attick Drachms, and the *Euboick* but 4000. *Vid. Brerewood de Ponderibus & Pretiis*, Cap. 9.

I ſhall

I ſhall conclude with two Lines, juſt to ſhew how by this Method may be remember'd the Year and Chapter of any particular Statute. Thoſe to whom a Hint of this Nature may perhaps be thought uſeful, are beſt capable of applying and improving it as they ſhall ſee Occaſion.

An Act for Prevention of FRAUDS and Perjuries, 29 CAROL. II. c. 3. [Fraud-Carol*en-t*]

An Act againſt Abuſes in Preſentation to Benefices (SIMONY) 31 ELIZ. c. 6. [Sim-El*ib-s*]

The Bill for Firſt-Fruits (PRIMITIÆ) 26 H-en. VIII. c. 3. [Primit-H*es-t*]

An Act for the Diſſolution of the MONASTERIES. The leſſer 27 H. VII. c. 28. } [Monaſt-H*ep-ek.ib-ba.*]
The greater 31 H. VIII. c. 11. }

Fraud-Carol*en-t* Sim-El*ib-s* Primit-H*es-t* Monaſt-H*ep-ek.ib-ba.*

To remember the ſeveral Statutes relating to the ſame Subject muſt needs be more difficult, as there is but one leading Syllable for the whole Line; but may be done in the following Manner.

Some of the principal Acts which relate to the Poor (PAUPERES) are 43 ELIZ. c. 2. 13, 14 Car. II. c. 82. 3, 4 William and M-ary, c. 81. 8, 9 WILL. III. c. 30. 9, 10 WILL. III. c. 11. 12 ANN. c. 18.

Paup-El*ot-e* Car*at,ad* Wi-M*t,eib* Will *iz.n,ab.* An-*ad-bei.*

FINIS.

INDEX

Vocum Memorialium.

THE

USE of the INDEX.

THE *following Index may be uſeful in two Reſpects; either as it will ſerve to try the Proficiency of the Learner, who may exerciſe himſelf in Reſolving and Explaining the Memorial Words, thus ſeparated from their proper Claſſes, and intermingled with each other; (which will at the ſame Time be a Means to fix them the better in his Memory:) or, as it may be to thoſe who are a little acquainted with the Art, but have not charged their Memories with the* Technical *Lines, a* ready Help *to anſwer many Queſtions in Chronology, Geography, Hiſtory,* &c. *without the Trouble of ſearching for them in the Tables. To make which the eaſier in the Hiſtorical and Chronological Part, it was thought proper to add a Letter or two, at the End of each Word; by the Help of which, and the Beginning of the Words together, any one, who is but tolerably acquainted with Hiſtory, and is Maſter of the General Key, will readily know what the Words ſtand for. The Abbreviations are as follow.*

A B. Archbiſhop of *Canterbury.*
Ær. Æra or Epocha.
B. Battle.
C. Council.
Ep. Epiſtle, *i. e.* the Time of Writing it.
Ev. Evangeliſt.
E R. Emperor of *Rome.*
E E. Emp. of the Eaſt.
E W. Emp. of the Weſt.
F. Father.
H. Heretick, Schiſmatick, *&c.*
H P. High Prieſt.
J. Judge of *Iſrael.*
K. King.
K Aſſ. King of *Aſſyria.*
K B. King of *Babylon.*
K E. King of *England.*
K Eg. King of *Egypt.*
K Ju. King of *Judah.*
K Iſ. King of *Iſrael.*
K M. King of *Media.*
K Ma. King of *Macedon.*
K P. King of *Perſia.*
K R. King of *Rome.*
K S. King of *Syria.*
L. Learned Man, Author, *&c.*
Leg. Legate.
Mart. Martyr.
P. Pope.
Pa. Patriarch.
Po. Poet.
Pr. Prophet.
Q. Queen.
W. War.
= different Names of the ſame Perſon.

Thoſe Words which have no Letter at the End of them, denote ſome Fact in Hiſtory; as Abaneb *the Calling of* Abraham.

The Italick Letters repreſent the Year before or after Chriſt. The Small Capitals M *and* P *in the middle of a Word denote the Year of the World, or of the* Julian *Period, as* TroyPilta, &c.

Be careful to give the right Pronunciation; and note, that the Accent, unleſs where otherwiſe marked, or when the Penultima is long by Poſition, is always on the Ante-penultima.

THE

The Conſtruction and Uſe of the GEOGRAPHICAL WORDS.

OF *Words conſiſting of two Parts in the ſame Character, join'd with an Hyphen, the firſt Part denotes a City, Town,* &c. *in a Kingdom, Region, or Province denoted by the latter: The Words in* Italick *Letters ſignifying Places in Ancient Geography; the Words in* Roman *Letters Places in Modern Geography. Thus Abdér-thra. Abdera a Town in ancient Thrace.* Aginc-art. Agincourt *in* Artois.

Words in a Parentheſis denote that the Place repreſented by the firſt Syllable, or Syllables, is one of thoſe repreſented by the latter, as (Anteg-lee) Antego *one of the* Leeward *Iſlands,* (Cub-ant) Cuba *one of the* Antilles.

The Letters N. E. S. W. *following a Word denote the Situation of a Place; as* Antill-luc S. *the* Antille *Iſlands, South of the* Lucay *Iſles;* Madér-barb W. Madera *Iſles, Weſt of* Barbary.

The Letters G S. *denote Sacred Geography.*

Italicks joined with an Hyphen denote the Latitude and Longitude of a Place; as Agrek-oit *the Latitude of* Agra 28 *Deg. the Longitude* 73.

Italicks *join'd with a Comma denote the Proportion of the Kingdom,* &c. *to* Great Britain, *as* Germt,*ut.* Germany *to* Great Britain *as* 3,53 *to* 1.

Italicks *joined without an Hyphen denote the Diſtance from* London *or* Jeruſalem; *as* Pardel *ſc.* Paris *from* London *about* 225 *Miles.* Antiochig, Antioch *from* Jeruſalem *about* 300 *Miles.*

Syllables joined with this Mark = *denote correſpondent Places of Ancient and Preſent Geography; as Ach* = livad, *the ancient Achaia the preſent* Livadia.

Voces Geographicæ.
